

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

MetLife Sterling Investment Grade Corporate Debt Fund (the "**Fund**"): Class M GBP Accumulating Shares ("**Class M GBP ACC**")

The Fund is a sub-fund of MetLife Investment Management UCITS ICAV (the "**ICAV**") ISIN: IE0001NMGU30

The Fund is managed by MetLife Investment Management Europe Limited (the "**Manager**")

Objectives and Investment Policy

The Investment Objective of the Fund is to seek to achieve long-term capital growth and income with a focus on sustainability.

The Fund will seek to achieve its objective by investing in a diversified portfolio of corporate bonds and other similar corporate debt instruments primarily denominated in Sterling. The Fund may also invest in agency, municipal, government sponsored, quasi-sovereign (an entity that is guaranteed or owned by a national government), and supranational (a multinational association) debt or similar.

The Fund complies with the disclosure requirements under Article 8 of Sustainable Finance Disclosure Regulation ("**SFDR**") and makes investments associated with positive externalities whilst avoiding investments associated with negative externalities, which is achieved through the consideration of principal adverse indicators and the application of exclusionary screens. Additionally, the Fund seeks to support companies with lower greenhouse gas ("**GHG**") intensity. For further details and sustainability related restrictions, please refer to the Supplement.

A maximum of 30% of the Fund's Net Asset Value ("**NAV**") may be invested in non-Sterling denominated securities subject to a hedging requirement to ensure not more than 10% of the NAV is exposed to currency fluctuations.

The Fund may invest in money market instruments, and up to a maximum of 10% of its NAV in collective investment schemes (including exchange traded funds).

At least 75% of the Fund's NAV must be held in corporate debt securities. No more than 25% of the Fund's NAV may be invested in securities that are convertible into equity securities. No more than 10% of the Fund's NAV may be invested in contingent convertible bonds. The

Fund may invest up to 10% of its NAV in Rule 144A securities (US privately offered securities sold to certain qualified institutional buyers). No more than 5% of the Fund's NAV may be held in securities rated below investment grade securities.

The Fund may utilise FDIs for efficient portfolio management and hedging purposes, in particular relating to currencies, interest rates and credit risks. The Fund may invest in credit default swaps, futures, options, interest rate swaps and forward contracts.

The Fund is actively managed and references the Bloomberg Sterling Non-Gilts TR Value Unhedged GBP Index (the "**Reference Index**"). The Investment Manager utilises the Reference Index for risk management purposes to assess positioning within the Fund relative to the Reference Index and for performance comparison purposes and aims to maintain the duration (sensitivity to the impact of changes to interest rates) of the Fund within a range of -0.25 to +0.25 years of that of the Reference Index.

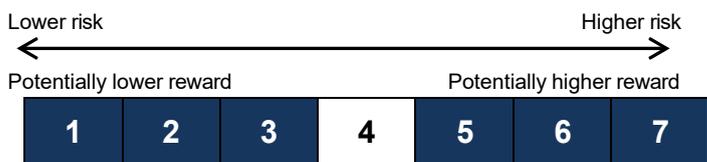

The Reference Index tracks the performance of the investment grade rated, sterling-denominated, fixed-rate bond market and includes government-related, corporate and securitised issues.

Shares in the Fund can be bought and sold on any bank business day in London. Class M GBP ACC is an accumulation share class. All income and capital gains in respect of the Fund attributable to all such Classes will be reinvested in the Fund and shall be reflected in the Net Asset Value per Share of the Fund.

An investment in the Fund should be viewed as a medium to long-term investment.

Please refer to the prospectus for the ICAV (the "Prospectus") and the Supplement for more detailed information.

Risk and Reward Profile

- This risk and reward indicator is calculated based on share class volatility (the ups and downs in its value) over the prior 5-year period. As this share class has not been in existence for 5 years, simulated historical performance data has been used.
- Simulated or historical data may not be a reliable indication of the future risk profile.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean the investment is "risk free".
- The Fund is in category 4 due to the above average range and frequency of price movements of its investments.

Risks materially relevant to the Fund which may not be adequately captured by the indicator include:

- **Credit Risk:** The issuer of a fixed income security may not be able to meet its obligations. Changes to the actual or perceived credit quality of an issue or issuer may lead to losses of invested capital
- **Liquidity Risk:** The Fund may at times hold securities that become less liquid over time making them more difficult to sell. Liquidity risk has the potential to impact the Fund's ability to meet redemption requests.
- **FDI Risk:** The Fund may utilize FDIs. The trading of FDIs is speculative with a high degree of price variability and may involve leverage. This may lead to large and sudden losses of capital.
- **Counterparty Risk:** The Fund may suffer losses if a counterparty to an over the counter ("**OTC**") derivative transaction defaults and is unable to meet its obligations.
- **Currency Risk:** The Fund invests in assets which are priced in currencies other than the Fund's base currency (GBP). There is a risk of loss to the value of your investment arising from exchange-rate fluctuations.

For a full list of possible risk factors, please refer to the section entitled "Risk Factors" in the Prospectus and the Supplement of the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	None
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In some cases, you may pay less - you can find this out from your financial advisor.

No charge is payable in respect of exchanges of shares in the Fund.

In the case of a large subscription or redemption by an investor, that investor may have to pay an additional charge (e.g., anti-dilution levy) to the Fund to cover the resulting portfolio transaction costs incurred.

The ongoing charges are used to pay the running costs of the Fund, including the costs of distributing and marketing the Fund. These charges reduce the potential growth of the investment. Ongoing charges exclude portfolio transaction costs (except potential entry or exit charges in the case of investments in other funds) and performance fees.

For more information about these charges, please refer to the Prospectus and the Supplement.
