METLIFE OPPORTUNISTIC HIGH YIELD FUND

Investment Objective

The MetLife Opportunistic High Yield Fund (the “Opportunistic High Yield Fund” or the “Fund”) seeks to provide a high level of current income consistent with the preservation of principal.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

	Institutional and Investor Shares
Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 90 days)	1.00%

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Institutional Shares	Investor Shares
Management Fees	0.55%	0.55%
Distribution and/or Service (12b-1) Fees	None	0.25%
Other Expenses	<u>0.52%</u>	<u>0.61%</u>
Shareholder Servicing Fees	0.06%	0.15%
Other Operating Expenses	0.46%	0.46%
Total Annual Fund Operating Expenses	1.07%	1.41%
Less Fee Reductions and/or Expense Reimbursements ¹	<u>(0.32)%</u>	<u>(0.41)%</u>
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	0.75%	1.00%

¹ MetLife Investment Management, LLC (the “Adviser”) has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses (collectively, “excluded expenses”)) from exceeding 0.75% of the average daily net assets of the Fund’s Institutional Shares and Investor Shares until February 28, 2026 (the “contractual expense limit”). In addition, the Adviser may receive from the Fund the difference

between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund III (the "Trust"), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2026.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Institutional Shares	\$77	\$309	\$559	\$1,277
Investor Shares	\$102	\$406	\$732	\$1,655

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the example, affect the Fund's performance. During its most recent fiscal year, the Fund's portfolio turnover rate was 100% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in high yield instruments (also known as "junk bonds") and other financial instruments with economic characteristics similar to such instruments, such as derivatives and exchange-traded funds ("ETFs"). This investment policy may be changed by the Fund upon 60 days' prior written notice to shareholders.

High yield instruments in which the Fund may invest include domestic and foreign bonds (including corporate bonds), convertible securities, forward commitments, loan participations and assignments, preferred stocks and privately issued securities (e.g., Rule 144A securities) that are rated below investment grade by Moody's Investors Service, Inc. ("Moody's"), or equivalently rated by S&P Global Ratings ("S&P") or Fitch, Inc. ("Fitch"), or, if unrated, determined by the Adviser to be of comparable quality.

The Fund may invest the remainder of its assets in investment grade instruments including securities issued or guaranteed by the U.S. Government and its agencies or instrumentalities, municipal bonds, corporate bonds, residential and commercial mortgage-backed securities, asset-backed securities, loan participations and assignments, U.S. dollar-denominated foreign debt securities and ETFs that invest in such instruments. The Fund may also invest up to 5% of its net assets in foreign currency-denominated securities. The Fund may also invest up to 10% of its net assets in securities and instruments that are economically tied to emerging market countries, which the Adviser defines as those countries that are: (i) characterized as developing or emerging by any of the World Bank, the United Nations, the International Finance Corporation, or the European Bank for Reconstruction and Development; (ii) included in an emerging markets index by a recognized index provider; or (iii) countries with similar developing or emerging characteristics as countries classified as emerging market countries pursuant to sub-paragraph (i) and (ii) above, in each case determined at the time of purchase. The Fund may also invest in equity securities, which are ownership interests in a public or private company or partnership and consist of common stocks, warrants and rights to acquire common stock, and investments in master limited partnerships ("MLPs"). The Fund may invest in securities of companies with any market capitalization.

The Fund also may invest up to 5% of its net assets in derivative instruments, such as options, futures contracts or swap agreements, for bona fide hedging purposes, to gain exposure to certain markets or segments of markets, and for speculative purposes. From time to time, the Fund may experience significant inflows; if this occurs, the Fund may, on a temporary or interim basis, invest these new assets (potentially in an amount which may approach up to 50% of the Fund's total net assets if new flows were extremely large relative to the Fund's current assets) in a combination of derivative instruments and other investment companies, including ETFs, until such time as the Adviser can identify and invest in appropriate high yield instruments in accordance with the Fund's principal strategy. The Fund may purchase or sell securities or other assets on a when-issued, delayed delivery or forward commitment basis. The Fund may borrow money for, among other reasons, cash management purposes, to obtain leverage and to meet redemptions.

The average portfolio duration of the Fund normally varies within two years (plus or minus) of the portfolio duration of the securities comprising the Bloomberg U.S. Corporate High-Yield Index, which as of September 30, 2024 was 2.85 years. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security's price to changes in interest rates.

In selecting investments for the Fund, the Adviser will consider the risks and opportunities presented by the industries within the high yield universe. The Adviser evaluates the bond issuers within the selected industries and identifies those investments which the Adviser believes have favorable risk reward characteristics and match the Adviser's investing philosophy. The Adviser evaluates various criteria such as historical and future expected financial performance, management tenure and experience, capital structure, free cash flow generation, barriers to entry, security protections, yield and relative value, and ownership structure. The Adviser targets investments that have individual yield premiums which appear to be favorable and are viewed by the Adviser as having a comparable or lower probability of default and/or loss risk.

The Fund may invest in cash or money market instruments for the purpose of meeting redemption requests or making other anticipated cash payments.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

High Yield or Below Investment Grade Securities (Junk Bonds) Risk — High yield or "junk" bonds involve greater risks of default or downgrade and are more volatile than investment grade securities because the prospect for repayment of principal and interest of many of these securities is speculative. Because these bonds typically offer a higher rate of return to compensate investors for these risks, they are referred to as "high yield bonds," but there is no guarantee that an investment in these securities will result in a high rate of return. These bonds also may be less liquid than higher quality investments.

Unrated Securities Risk — Debt securities that are not rated by Moody's, S&P or Fitch may not have an active trading market or may be difficult to value, which means the Fund might have difficulty selling them promptly at an acceptable price.

Credit Risk — The risk that the issuer of a security or the counterparty to a contract will default or otherwise become unable to honor a financial obligation.

Market Risk — The risk that the market value of an investment may move up and down, sometimes rapidly and unpredictably. From time to time, certain investments held by the Fund may have limited marketability and may be difficult to value and sell at favorable times or prices. Markets for securities in which the Fund invests may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. In addition, extraordinary events outside the control of the Fund, including acts of God (e.g., fire, flood, earthquake, storm, hurricane or other natural disaster), acts of war (e.g., war, invasion, acts of foreign enemies, hostilities, insurrection, or terrorist activities, whether war is declared or not) and global health events, such as epidemics, pandemics and disease, and their related social and economic impacts, may cause significant adverse market conditions and result in losses in value to the Fund's investments. Such events may initially negatively affect a particular industry, sector, country or region and may spread quickly or unpredictably to negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Adverse market conditions may be prolonged and may adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund.

Fixed Income Market Risk — The prices of the Fund's fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments and their agencies. Generally, the value of the Fund's fixed income securities will vary inversely with the direction of prevailing interest rates. Declines in dealer market-making capacity as a result of structural or regulatory changes could decrease liquidity and/or increase volatility in the fixed income markets. In the case of foreign securities, price fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. In response to these events, the Fund's value may fluctuate and/or the Fund may experience increased redemptions from shareholders, which may impact the Fund's liquidity or force the Fund to sell securities into a declining or illiquid market.

Investment Style Risk — The risk that high yield fixed income securities may underperform other segments of the fixed income markets or the fixed income markets as a whole.

Investment Strategy Risk — The risk that the Fund's investment strategy may underperform other segments of the below investment grade bond markets or the bond markets as a whole.

Corporate Fixed Income Securities Risk — Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as perceptions of the creditworthiness and business prospects of individual issuers.

Bank Loans Risk — The Fund may invest in bank loans through participations or assignments. Investments in bank loans (through both assignments and participations) are generally subject to the same risks as investments in other types of debt instruments, including, in many cases, investments in junk bonds. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and the Fund may not benefit directly from any collateral supporting the loan in which they have purchased the participation. As a result, the Fund will assume the credit risk of both the borrower and the lender that is selling the participation. When the Fund purchases assignments from lenders the Fund will acquire direct rights against the borrower on the loan. The Fund may have difficulty disposing of bank loans because, in certain cases, the market for such instruments is not highly liquid. The lack of a highly liquid secondary market may have an adverse impact on the value of such instruments and on the Fund's ability to dispose of the bank loan in response to a specific economic event, such as deterioration in the creditworthiness of the borrower, which may cause the Fund to be unable to realize the full value of its investment in a bank loan. There may be limited public information available regarding bank loans and bank loans may be difficult to value. If the Fund holds a bank loan through another financial institution, or relies on a financial institution to administer the loan, its receipt of principal and interest on the loan may be subject to the credit risk of that financial institution. It is possible that any collateral securing a loan may be insufficient or unavailable to the Fund, and that the Fund's rights to collateral may be limited by bankruptcy or insolvency laws. Bank loans may not be considered "securities," and purchasers, such as the Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Interest Rate Risk — The risk that a change in interest rates will cause a fall in the value of fixed income securities, including U.S. Government securities, in which the Fund invests. Generally, the value of the Fund's fixed income securities will vary inversely with the direction of prevailing interest rates. Changing interest rates may have unpredictable effects on the markets and may affect the value and liquidity of instruments held by the Fund. Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates.

Call Risk — The risk that an issuer may exercise its right to redeem a fixed income security earlier than expected (a call). If an issuer calls a security that the Fund has invested in, the Fund may not recoup the full amount of its initial investment and may be forced to reinvest in lower-yielding securities, securities with greater credit risks or securities with other, less favorable features.

Prepayment Risk — The risk that, in a declining interest rate environment, fixed income securities with stated interest rates may have the principal paid earlier than expected. Such sooner-than-expected principal payments may reduce the returns of the Fund because of loss of expected future interest payments on the principal amount paid back early and requires the Fund to invest the proceeds at generally lower interest rates.

Duration Risk — The longer-term securities in which the Fund may invest tend to be more volatile than shorter-term securities. A portfolio with a longer average portfolio duration is more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

Extension Risk — The risk that rising interest rates may extend the duration of a fixed income security, typically reducing the security's value.

Liquidity Risk — The risk that certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to accept a lower the price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on Fund management or performance.

Valuation Risk — The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

Exchange-Traded Funds (ETFs) Risk — The risks of owning shares of an ETF generally reflect the risks of owning the underlying securities in which the ETF invests, although lack of liquidity in an ETF could result in its value being more volatile than the underlying portfolio securities. When the Fund invests in an ETF, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the ETF's expenses.

Money Market Instruments Risk — The value of money market instruments may be affected by changing interest rates and by changes in the credit ratings of the investments. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by any bank, the FDIC or any other government agency. A money market fund's sponsor has no legal obligation to provide financial support to the fund, and there should be no expectation that the sponsor will provide financial support to the fund at any time. Certain money market funds float their net asset value while others seek to preserve the value of investments at a stable net asset value (typically, \$1.00 per share). An investment in a money market fund, even an investment in a fund seeking to maintain a stable net asset value per share, is not guaranteed and it is possible for the Fund to lose money by investing in these and other types of money market funds. Under certain circumstances where a money market fund experiences heightened redemptions, it may be required to impose a mandatory liquidity fee on amounts the Fund redeems from the money market fund (i.e., impose a liquidity fee). In addition, a money market fund may

impose a liquidity fee of up to 2% on amounts the Fund redeems from the money market fund during circumstances where the money market fund's board of directors determines such fee would be in the money market fund's best interests. These measures may result in an investment loss. Money market funds and the securities they invest in are subject to comprehensive regulations. The regulations governing money market funds were recently amended in July, 2023, and their implementation and interpretation, as well as enforcement, may affect the manner of operation, performance and/or yield of money market funds.

Leverage Risk — The Fund's use when-issued, delayed delivery or forward commitment transactions may result in the Fund's total investment exposure substantially exceeding the value of its portfolio securities and, in certain cases, the Fund's investment returns depending substantially on the performance of securities that the Fund may not directly own. The use of leverage can amplify the effects of market volatility on the Fund's share price and may also cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. In the case of borrowings, the Fund may experience losses if its borrowing costs exceed the investment returns on the securities purchased with the borrowed money. The Fund's use of leverage may result in a heightened risk of investment loss.

Convertible Securities and Preferred Stocks Risk — Convertible and preferred securities have many of the same characteristics as stocks, including many of the same risks. In addition, convertible securities may be more sensitive to changes in interest rates than stocks. Convertible securities may also have credit ratings below investment grade, meaning that they carry a higher risk of failure by the issuer to pay principal and/or interest when due.

Equity Market Risk — The risk that stock prices will fall over short or extended periods of time.

Warrants and Rights Risk — Warrants and rights may be more speculative than other types of investments. The price of a warrant or right may be more volatile than the price of its underlying security, and a warrant or right may offer greater potential for capital appreciation as well as capital loss. A warrant or right ceases to have value if it is not exercised prior to its expiration date.

When-Issued and Delayed Delivery Securities and Forward Commitments Risk — When-issued and delayed delivery securities and forward commitments involve the risk that the security the Fund buys will lose value prior to its delivery.

Derivatives Risk — The Fund may use of futures contracts which are subject to market risk, leverage risk, liquidity risk, credit risk and valuation risk and are described elsewhere in this section. There also is risk of correlation in that the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Each of these risks could cause the Fund to lose more than the principal

amount invested in a derivative instrument. Some derivatives have the potential for unlimited loss, regardless of the size of the Fund's initial investment. The other parties to certain derivative contracts present the same types of credit risk as issuers of fixed income securities. The Fund's use of derivatives may also increase the amount of taxes payable by shareholders. Both U.S. and non-U.S. regulators have adopted and implemented regulations governing derivatives markets, the ultimate impact of which remains unclear.

Privately Issued Securities Risk — Investment in privately placed securities may be less liquid than in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices realized from these sales could be less than those originally paid by the Fund or less than what may be considered the fair value of such securities. Further, companies whose securities are not publicly traded may not be subject to the disclosure and other investor protection requirements that might be applicable if their securities were publicly traded.

Foreign Company Risk — Investing in foreign companies poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the U.S. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund. These additional risks may be heightened with respect to emerging market countries because political turmoil and rapid changes in economic conditions are more likely to occur in these countries.

Asset-Backed Securities Risk — Payment of principal and interest on asset-backed securities is dependent largely on the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets. Securitization trusts generally do not have any assets or sources of funds other than receivables and related property they own, and asset-backed securities are generally not insured or guaranteed by the related sponsor or any other entity. Asset-backed securities may be more illiquid than more conventional types of fixed income securities that the Fund may acquire.

Mortgage-Backed Securities Risk — Mortgage-backed securities are affected significantly by the rate of prepayments and modifications of the mortgage loans backing those securities, as well as by other factors such as borrower defaults, delinquencies, realized or liquidation losses and other shortfalls. Mortgage-backed securities are particularly sensitive to prepayment risk, which is described below, given that the term to maturity for mortgage loans is generally substantially longer than the expected lives of those securities; however, the timing and amount of prepayments cannot be accurately predicted. The timing of changes in the rate of prepayments of the mortgage loans may significantly affect the Fund's actual yield to maturity on any mortgage-backed securities, even if the average rate of principal payments is consistent with the Fund's expectation. Along with prepayment risk, mortgage-backed securities are significantly affected by interest rate risk, which is described above. In a low interest rate environment, mortgage loan prepayments would generally be expected to increase due to factors such as refinancings and loan modifications at lower interest rates. In contrast, if prevailing interest rates rise, prepayments of mortgage loans would generally be expected to decline and therefore extend the weighted average lives of mortgage-backed securities held or acquired by the Fund.

Municipal Securities Risk — Municipal securities, like other fixed income securities, rise and fall in value in response to economic and market factors, primarily changes in interest rates, and actual or perceived credit quality. Rising interest rates will generally cause municipal securities to decline in value. Longer-term securities respond more sharply to interest rate changes than do shorter-term securities. A municipal security will also lose value if, due to rating downgrades or other factors, there are concerns about the issuer's current or future ability to make principal or interest payments. State and local governments rely on taxes and, to some extent, revenues from private projects financed by municipal securities, to pay interest and principal on municipal debt. Poor statewide or local economic results or changing political sentiments may reduce tax revenues and increase the expenses of municipal issuers, making it more difficult for them to meet their obligations. Actual or perceived erosion of the creditworthiness of municipal issuers may reduce the value of the Fund's holdings. As a result, the Fund will be more susceptible to factors that adversely affect issuers of municipal obligations than a mutual fund that does not have as great a concentration in municipal obligations.

U.S. Government Securities Risk — Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources.

Small- and Mid-Capitalization Companies Risk — Small- and mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small- and mid-capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small- and mid-capitalization stocks may be more volatile than those of larger companies. Small- and mid-capitalization stocks may be traded over-the-counter or listed on an exchange.

Large Capitalization Risk — The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Master Limited Partnerships (MLPs) Risk — MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in a MLP also include those involved in investing in a partnership as opposed to a corporation, such as limited control of management, limited voting rights and tax risks. MLPs may be subject to state taxation in certain jurisdictions, which will have the effect of reducing the amount of income paid by the MLP to its investors.

Portfolio Turnover Risk — The Fund may buy and sell securities frequently. Such a strategy often involves higher expenses, including brokerage commissions, and may increase the amount of capital gains (in particular, short term gains) realized by the Fund. Shareholders may pay tax on such capital gains and will indirectly incur additional expenses related to a fund with a higher portfolio turnover rate.

Large Purchase and Redemption Risk — Large purchases or redemptions of the Fund's shares may force the Fund to purchase or sell securities at times when it would not otherwise do so, and may cause the Fund's portfolio turnover rate and transaction costs to rise, which may negatively affect the Fund's performance and have adverse tax consequences for Fund shareholders.

Performance Information

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund's Institutional Shares performance from year to year and by showing how the Fund's average annual total returns for 1 year, 5 years and since inception compare with those of a broad measure of market performance and a more narrowly based index with characteristics relevant to the Fund's investment strategies. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Prior to February 28, 2025, Mesirow Financial Investment Management, Inc. served as investment adviser to the Fund.

Updated performance information is available by calling (800) 252-4993 or on the Internet at <https://investments.metlife.com/mutual-fund-documents>.

Average Annual Returns for Periods Ended December 31, 2024

This table compares the Fund's average annual total returns for the periods ended December 31, 2024 to those of an appropriate broad-based index and a more narrowly based index with characteristics relevant to the Fund's investment strategies.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their

Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRAs"). After tax returns are shown for Institutional Shares only. After tax returns for Investor Shares will vary.

MetLife Opportunistic High Yield Fund	1 Year	5 Years	Since Inception (12/03/2018)
Fund Returns Before Taxes			
Institutional Shares	10.09%	5.68%	6.30%
Investor Shares	9.72%	5.39%	6.03%
Fund Returns After Taxes			
Institutional Shares	6.07%	1.96%	2.58%
Fund Returns After Taxes on Distributions and Sale of Fund Shares			
Institutional Shares	5.88%	2.68%	3.17%
Bloomberg U.S. Aggregate Index (reflects no deduction for fees, expenses or taxes)¹	1.25%	(0.33)%	1.39%
Bloomberg U.S. Corporate High Yield Index (reflects no deduction for fees, expenses or taxes)¹	8.19%	4.21%	5.30%

¹ Pursuant to new regulatory requirements, the Fund's broad-based securities market index has changed from the Bloomberg U.S. Corporate High Yield Index to the Bloomberg U.S. Aggregate Index.

Investment Adviser

MetLife Investment Management, LLC

Portfolio Managers

Robert Sydow, Portfolio Manager, has managed the Fund since its inception in 2018.

Kevin Buckle, CFA, Portfolio Manager, has managed the Fund since its inception in 2018.

James Lisko, Portfolio Manager, has managed the Fund since its inception in 2018.

METLIFE SMALL COMPANY EQUITY FUND

Investment Objective

The MetLife Small Company Equity Fund (the “Small Company Equity Fund” or the “Fund”) seeks to provide long-term capital appreciation with less volatility than the U.S. small company market.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

	Institutional and Investor Shares
Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 90 days)	1.00%

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Institutional Shares	Investor Shares
Management Fees	0.75%	0.75%
Distribution and/or Service (12b-1) Fees	None	0.25%
Other Expenses	<u>1.00%</u>	<u>1.15%</u>
Shareholder Servicing Fees	0.01%	0.15%
Other Operating Expenses	0.99%	1.00%
Total Annual Fund Operating Expenses	1.75%	2.15%
Less Fee Reductions and/or Expense Reimbursements ¹	<u>(0.77)%</u>	<u>(0.92)%</u>
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	0.98%	1.23%

¹ MetLife Investment Management, LLC (the “Adviser”) has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses (collectively, “excluded expenses”)) from exceeding 0.98% of the average daily net assets of the Fund’s Institutional Shares and Investor Shares until February 28, 2026 (the “contractual expense limit”). In addition, the Adviser may receive from the Fund the

difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of the prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund III (the "Trust"), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2026.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Institutional Shares	\$100	\$476	\$877	\$1,999
Investor Shares	\$125	\$584	\$1,070	\$2,410

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the example, affect the Fund's performance. During its most recent fiscal year, the Fund's portfolio turnover rate was 92% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities of small companies. This investment policy may be changed by the Fund upon 60 days' prior written notice to shareholders.

For purposes of the Fund's 80% policy, equity securities include common stocks and exchange-traded funds ("ETFs") with economic characteristics similar to equity securities. The Fund considers small companies to be those with market capitalizations within the range of the market capitalizations of companies in the

Russell 2500 Index at the time of purchase, and ETFs that aim to replicate or produce returns that generally correspond to small company indexes. The market capitalization range of the Russell 2500 Index was approximately \$11 million to \$34.8 billion as of September 30, 2024, and may change over time. At any given time, the Fund may own a diversified group of stocks in several industries.

The Adviser employs a relative value philosophy to identify companies that the Adviser believes have attractive valuations and a high probability for accelerated earnings and cash flow growth compared to their peers. The Adviser evaluates broad themes and market developments that it believes can be exploited through portfolio construction and rigorous fundamental research to identify investments that are best positioned to take advantage of catalysts and trends that may positively change the earnings potential and cash flow growth of a target company. The Adviser believes that earnings and cash flow growth are the principal drivers of investment performance, particularly when accompanied by visible, quantifiable catalysts that have not been fully recognized by the investment community.

Further, the Adviser considers various operational and structural factors within its fundamental assessment of macro, sector and company specific trends. Factors taken into consideration may include (but are not limited to): business model risks that may arise from general economic activity, interest rates, business input costs and changes to industry structure; governance factors such as board composition, share class structure and shareholder voting rights; environmental factors such as resource usage and carbon intensity; social factors such as workplace policies, child labor and human rights; and other qualitative factors that may impede a company's ability to reach stated goals and objectives. The Adviser believes companies that reduce exposure to broad risk factors have the potential to reduce the cost of capital, materially lower operating costs or increase the profitability of a company, which may, in turn, lead to higher investment returns for the Fund.

The Adviser continuously monitors and evaluates investments held by the Fund to discern changes in trends, modify investment outlooks, and adjust valuations accordingly. The Adviser attempts to mitigate excess risk through ownership of what it considers a well-diversified portfolio with broad representation across market industries and sectors. The Adviser seeks to actively encourage management of the Fund's portfolio companies to make incremental positive changes to their business models and risk infrastructure with the goal of producing better investment results. From time to time, the Fund may focus its investments in a particular sector or sectors of the economy. The Adviser will liquidate an investment based on several factors, including asset valuation, changes in prospective attributes, and purchases of alternative investments with potentially higher returns. The Adviser generally will not immediately sell a stock merely due to market appreciation outside the Fund's target capitalization range if it believes the company has growth potential.

Due to its investment strategy, the Fund may buy and sell securities frequently. This may result in higher transaction costs and more capital gains tax liabilities than a fund with a buy and hold strategy.

The Fund may invest in cash or money market instruments for the purpose of meeting redemption requests or making other anticipated cash payments.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Market Risk — The risk that the market value of an investment may move up and down, sometimes rapidly and unpredictably. From time to time, certain investments held by the Fund may have limited marketability and may be difficult to value and sell at favorable times or prices. Markets for securities in which the Fund invests may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. In addition, extraordinary events outside the control of the Fund, including acts of God (e.g., fire, flood, earthquake, storm, hurricane or other natural disaster), acts of war (e.g., war, invasion, acts of foreign enemies, hostilities, insurrection, or terrorist activities, whether war is declared or not) and global health events, such as epidemics, pandemics and disease, and their related social and economic impacts, may cause significant adverse market conditions and result in losses in value to the Fund's investments. Such events may initially negatively affect a particular industry, sector, country or region and may spread quickly or unpredictably to negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Adverse market conditions may be prolonged and may adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund.

Equity Market Risk — The risk that stock prices will fall over short or extended periods of time.

Small Companies Risk — Small companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small companies may have limited product lines, markets and financial resources and may depend upon a relatively small

management group. Therefore, stocks of small companies may be more volatile than those of larger companies. Stocks of small companies may be traded over-the-counter or listed on an exchange.

Sector Emphasis Risk — The securities of companies in the same business sector, if comprising a significant portion of the Fund's portfolio, may in some circumstances react negatively to market conditions, interest rates and economic, regulatory or financial developments and adversely affect the value of the portfolio to a greater extent than if such securities comprised a lesser portion of the Fund's portfolio or the Fund's portfolio was diversified across a greater number of industry sectors.

Investment Style Risk — Relative value investing focuses on companies with stocks that appear undervalued in light of factors such as the company's earnings, book value, revenues or cash flow. If the Adviser's assessment of market conditions, or a company's value or prospects for exceeding earnings expectations, is wrong, the Fund could suffer losses or produce poor performance relative to other funds.

Investment Strategy Risk — The risk that the Fund's investment strategy may underperform other segments of the small capitalization equity markets or the equity markets as a whole.

Liquidity Risk — The risk that certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on Fund management or performance.

Valuation Risk — The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

Exchange-Traded Funds (ETFs) Risk — The risks of owning shares of an ETF generally reflect the risks of owning the underlying securities in which the ETF invests, although lack of liquidity in an ETF could result in its value being more volatile than the underlying portfolio securities. When the Fund invests in an ETF, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the ETF's expenses.

Money Market Instruments Risk — The value of money market instruments may be affected by changing interest rates and by changes in the credit ratings of the investments. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by any bank, the FDIC or any other government agency. A money market fund's sponsor has no legal obligation to provide financial support to the fund, and there should be no expectation that the sponsor will provide financial support to the fund at any time. Certain money market funds float their net asset value while others seek to preserve the value of investments at a stable net asset value (typically, \$1.00 per share). An investment in a money market fund, even

an investment in a fund seeking to maintain a stable net asset value per share, is not guaranteed and it is possible for the Fund to lose money by investing in these and other types of money market funds. Under certain circumstances where a money market fund experiences heightened redemptions, it may be required to impose a mandatory liquidity fee on amounts the Fund redeems from the money market fund (i.e., impose a liquidity fee). In addition, a money market fund may impose a liquidity fee of up to 2% on amounts the Fund redeems from the money market fund during circumstances where the money market fund's board of directors determines such fee would be in the money market fund's best interests. These measures may result in an investment loss. Money market funds and the securities they invest in are subject to comprehensive regulations. The regulations governing money market funds were recently amended in July, 2023, and their implementation and interpretation, as well as enforcement, may affect the manner of operation, performance and/or yield of money market funds.

Portfolio Turnover Risk — The Fund may buy and sell securities frequently. Such a strategy often involves higher expenses, including brokerage commissions, and may increase the amount of capital gains (in particular, short term gains) realized by the Fund. Shareholders may pay tax on such capital gains and will indirectly incur additional expenses related to a fund with a higher portfolio turnover rate.

Large Purchase and Redemption Risk — Large purchases or redemptions of the Fund's shares may force the Fund to purchase or sell securities at times when it would not otherwise do so, and may cause the Fund's portfolio turnover rate and transaction costs to rise, which may negatively affect the Fund's performance and have adverse tax consequences for Fund shareholders.

Performance Information

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund's Institutional Shares performance from year to year and by showing how the Fund's average annual total returns for 1 year, 5 years and since inception compare with those of a broad measure of market performance and a more narrowly based index with characteristics relevant to the Fund's investment strategies. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Between September 14, 2022 and February 28, 2025, Mesirow Institutional Investment Management, Inc. served as investment adviser to the Fund, and prior to September 14, 2022, Mesirow Financial Investment Management, Inc. served as investment adviser to the Fund.

Updated performance information is available by calling (800) 252-4993 or on the Internet at <https://investments.metlife.com/mutual-fund-documents>.

Average Annual Returns for Periods Ended December 31, 2024

This table compares the Fund's average annual total returns for the periods ended December 31, 2024 to those of an appropriate broad-based index and a more narrowly based index with characteristics relevant to the Fund's investment strategies.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRAs"). After tax returns are shown for Institutional Shares only. After tax returns for Investor Shares will vary.

MetLife Small Company Equity Fund	1 Year	5 Years	Since Inception (12/19/2018)
Fund Returns Before Taxes			
Institutional Shares	14.42%	10.51%	11.90%
Investor Shares	14.24%	10.40%	11.81%
Fund Returns After Taxes			
Institutional Shares	12.17%	8.09%	9.34%
Fund Returns After Taxes on Distributions and Sale of Fund Shares			
Institutional Shares	9.85%	7.58%	8.64%
Russell 3000 Index (reflects no deduction for fees, expenses or taxes)¹	23.81%	13.86%	16.46%
Russell 2000 Index (reflects no deduction for fees, expenses or taxes)¹	11.54%	7.40%	10.17%

¹ Pursuant to new regulatory requirements, the Fund's broad-based securities market index has changed from the Russell 2000 Index to the Russell 3000 Index.

Investment Adviser

MetLife Investment Management, LLC

Portfolio Managers

Leo Harmon, CFA, CAIA, Portfolio Manager, has managed the Fund since its inception in 2018.

John Nelson, CFA, Portfolio Manager, has managed the Fund since 2023.

Eric Jacobsohn, CFA, Portfolio Manager, has managed the Fund since 2023.

Andrew Hadland, CFA, Portfolio Manager, has managed the Fund since 2023.

For important information about the purchase and sale of Fund shares, taxes and financial intermediary compensation, please turn to "Summary Information about the Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation" on page 22 of the prospectus.

SUMMARY INFORMATION ABOUT THE PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARY COMPENSATION

You may generally purchase or redeem shares on any day that the New York Stock Exchange ("NYSE") is open for business.

To purchase Institutional Shares of the Opportunistic High Yield Fund for the first time, you must invest at least \$1,000,000. To purchase Institutional Shares of the Small Company Equity Fund for the first time, you must invest at least \$100,000. To purchase Investor Shares of each Fund for the first time, you must invest at least \$5,000. There is no minimum for subsequent investments.

The Funds may accept investments of smaller amounts in its sole discretion.

If you own your shares directly, you may redeem your shares by contacting the Funds directly by mail at: MetLife Funds P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: MetLife Funds, c/o SS&C Global Investor & Distribution Solutions, Inc., 801 Pennsylvania Avenue, Suite 219009, Kansas City, MO 64105-1307) or telephone at (800) 252-4993.

If you own your shares through an account with a broker or other financial intermediary, contact that broker or financial intermediary to redeem your shares. Your broker or financial intermediary may charge a fee for its services in addition to the fees charged by the Funds.

Tax Information

Each Fund intends to make distributions that may be taxed as qualified dividend income, ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement accounts ("IRAs"), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of a Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend a Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.

MORE INFORMATION ABOUT THE FUNDS' INVESTMENT OBJECTIVES AND STRATEGIES

The investment objective of the Opportunistic High Yield Fund is to seek to provide a high level of current income consistent with the preservation of principal.

The investment objective of the Small Company Equity Fund is to seek to provide long-term capital appreciation with less volatility than the U.S. small company market.

The investment objective of each Fund is not a fundamental policy and may be changed by the Board without shareholder approval.

The investments and strategies described in this prospectus are those that the Funds use under normal conditions. During unusual economic or market conditions, or for temporary defensive or liquidity purposes, each Fund may, but is not obligated to, invest up to 100% of its assets in money market instruments and other cash equivalents that would not ordinarily be consistent with its investment objective. If a Fund invests in this manner, it may cause the Fund to forgo greater investment returns for the safety of principal and the Fund may therefore not achieve its investment objective. A Fund will only do so if MetLife Investment Management, LLC (the "Adviser") believes that the risk of loss outweighs the opportunity for capital appreciation or current income for that Fund.

This prospectus describes the Funds' principal investment strategies, and the Funds will normally invest in the types of securities and other investments described in this prospectus. In addition to the securities and other investments and strategies described in this prospectus, each Fund also may invest to a lesser extent in other securities, use other strategies and engage in other investment practices that are not part of its principal investment strategies. These investments and strategies, as well as those described in this prospectus, are described in detail in the Funds' Statement of Additional Information ("SAI") (for information on how to obtain a copy of the SAI see the back cover of this prospectus). Of course, there is no guarantee that a Fund will achieve its investment goals.

More Information about Risk

Investing in the Funds involves risk and there is no guarantee that a Fund will achieve its goals. The Adviser's judgments about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these judgments may affect the return on your investment. In fact, no matter how good of a job the Adviser does, you could lose money on your investment in a Fund, just as you could with similar investments.

The value of your investment in a Fund is based on the value of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities the Fund owns and the markets in which they trade. The effect on a Fund of a change in the value of a single security will depend on how widely the Fund diversifies its holdings.

Asset-Backed Securities Risk (Opportunistic High Yield Fund only) — Asset-backed securities are securities that are backed primarily by the cash flows of a discrete pool of fixed or revolving receivables or other financial assets that by their terms convert into cash within a finite time period. Asset-backed securities include mortgage-backed securities, but the term is more commonly used to refer to securities supported by non-mortgage assets such as auto loans, motor vehicle leases, student loans, credit card receivables, floorplan receivables, equipment leases and peer-to-peer loans. The assets are removed from any potential bankruptcy estate of an operating company through the true sale of the assets to an issuer that is a special purpose entity, and the issuer obtains a perfected security interest in the assets. Payments of principal of and interest on asset-backed securities rely entirely on the performance of the underlying assets. Asset-backed securities are generally not insured or guaranteed by the related sponsor or any other entity and therefore, if the assets or sources of funds available to the issuer are insufficient to pay those securities, a Fund will incur losses. In addition, asset-backed securities entail prepayment risk that may vary depending on the type of asset, but is generally less than the prepayment risk associated with mortgage-backed securities.

Bank Loans Risk (Opportunistic High Yield Fund only) – Bank loans are arranged through private negotiations between a company and one or more financial institutions (lenders). Investments in bank loans are generally subject to the same risks as investments in other types of debt instruments, including, in many cases, investments in junk bonds. This means bank loans are subject to greater credit risks than other investments, including a greater possibility that the borrower will be adversely affected by changes in market or economic conditions and may default or enter bankruptcy. Bank loans made in connection with highly leveraged transactions, including operating loans, leveraged buyout loans, leveraged capitalization loans and other types of acquisition financing, are subject to greater credit risks than other types of bank loans. In addition, it may be difficult to obtain reliable information about and value any bank loan.

A Fund may invest in bank loans in the form of participations in the loans (participations) and assignments of all or a portion of the loans from third parties (assignments). In connection with purchasing participations, a Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and

the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund will assume the credit risk of both the borrower and the lender that is selling the participation. When a Fund purchases assignments from lenders, the Fund will acquire direct rights against the borrower on the loan. A Fund may have difficulty disposing of bank loans because, in certain cases, the market for such instruments is not highly liquid. The lack of a highly liquid secondary market may have an adverse impact on the value of such instruments and on a Fund's ability to dispose of the bank loan in response to a specific economic event, such as deterioration in the creditworthiness of the borrower. Furthermore, transactions in many loans settle on a delayed basis, and the Fund may not receive the proceeds from the sale of a loan for a substantial period of time after the sale. As a result, those proceeds will not be available to make additional investments or to meet a Fund's redemption obligations.

Bank loans may not be considered "securities," and purchasers, such as a Fund, therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Call Risk (Opportunistic High Yield Fund only) — The risk that an issuer may exercise its right to redeem a fixed income security earlier than expected (a call). If an issuer calls a security that the Fund has invested in, the Fund may not recoup the full amount of its initial investment and may be forced to reinvest in lower-yielding securities, securities with greater credit risks or securities with other, less favorable features. Fixed income securities may be called due to falling interest rates or non-economical circumstances.

Convertible Securities and Preferred Stocks Risk (Opportunistic High Yield Fund only) — Convertible securities are bonds, debentures, notes, preferred stock or other securities that may be converted into or exercised for a prescribed amount of common stock at a specified time and price. Convertible securities provide an opportunity for equity participation, with the potential for a higher dividend or interest yield and lower price volatility compared to common stock. Convertible securities typically pay a lower interest rate than nonconvertible bonds of the same quality and maturity because of the conversion feature. The value of a convertible security is influenced by changes in interest rates, with investment value typically declining as interest rates increase and increasing as interest rates decline, and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature. Convertible securities may also be rated below investment grade (junk bonds) or not rated and are subject to credit risk and prepayment risk, which are discussed below.

Preferred stocks are nonvoting equity securities that pay a stated fixed or variable rate dividend. Due to their fixed income features, preferred stocks provide higher income potential than issuers' common stocks, but are typically more sensitive to

interest rate changes than an underlying common stock. Preferred stocks are also subject to equity market risk, which is the risk that stock prices will fluctuate and can decline and reduce the value of a Fund's investment. The rights of preferred stocks on the distribution of a corporation's assets in the event of a liquidation are generally subordinate to the rights associated with a corporation's debt securities. Preferred stock may also be subject to prepayment risk, which is discussed below.

Corporate Fixed Income Securities Risk (Opportunistic High Yield Fund only)

— Corporate fixed income securities are fixed income securities issued by public and private businesses. Corporate fixed income securities respond to economic developments, especially changes in interest rates, as well as perceptions of the creditworthiness and business prospects of individual issuers. Corporate fixed income securities are subject to the risk that the issuer may not be able to pay interest or, ultimately, to repay principal upon maturity. Interruptions or delays of these payments could adversely affect the market value of the security. In addition, due to lack of uniformly available information about issuers or differences in the issuers' sensitivity to changing economic conditions, it may be difficult to measure the credit risk of corporate securities.

Credit Risk (Opportunistic High Yield Fund only) — Credit risk is the risk that a Fund could lose money if the issuer or guarantor of a portfolio security or a counterparty to a contract fails to make timely payment or otherwise honor its obligations. An actual or perceived decline in the credit quality of a security or other investment, an issuer of a security, or a provider of credit support or a maturity-shortening structure for a security can cause the price of such security or other investment to decrease. A Fund can lose money as a result.

Derivatives Risk (Opportunistic High Yield Fund only) — Derivatives are instruments that derive their value from an underlying security, financial asset or an index. Examples of derivative instruments include futures contracts, forward contracts, options and swaps. The primary risk of derivative instruments is that changes in the market value of securities held by a Fund and of the derivative instruments relating to those securities may not be proportionate. There may not be a liquid market for a Fund to sell a derivative instrument, which could result in difficulty in closing the position. Moreover, certain derivative instruments can magnify the extent of losses incurred due to changes in the market value of the securities to which they relate. Some derivative instruments are subject to counterparty risk. A default by the counterparty on its payments to a Fund will cause the value of your investment in the Fund to decrease. A Fund's use of derivatives is also subject to credit risk, leverage risk, lack of availability risk, valuation risk, correlation risk and tax risk. Credit risk is described above. Leverage risk is described below. Lack of availability risk is the risk that suitable derivative transactions may not be available in all circumstances for risk management or other purposes. Valuation risk is the risk that a particular derivative may be valued incorrectly. Correlation risk is the risk that changes in the value of the derivative may not correlate perfectly with

the underlying asset, rate or index. Tax risk is the risk that the use of derivatives may cause a Fund to realize higher amounts of short-term capital gains, thereby increasing the amount of taxes payable by shareholders. These risks could cause a Fund to lose more than the principal amount invested. Some derivatives have the potential for unlimited loss, regardless of the size of a Fund's initial investment. A Fund's counterparties to its derivative contracts present the same types of credit risk as issuers of fixed income securities.

Derivatives are also subject to a number of other risks described elsewhere in this prospectus. Derivatives transactions entered into on non-U.S. exchanges may not be conducted in the same manner as those entered into on U.S. exchanges, and may be subject to different margin, exercise, settlement or expiration procedures. Derivatives transactions entered into on non-U.S. exchanges also are subject to the risks affecting foreign securities, currencies and other instruments, in addition to other risks.

Both U.S. and non-U.S. regulators have adopted and implemented regulations governing derivatives markets, including mandatory clearing of certain derivatives, margin and reporting requirements. Regulation relating to a Fund's use of derivatives and related instruments, including Rule 18f-4 under the Investment Company Act of 1940, as amended (the "1940 Act"), could potentially limit or impact a Fund's ability to invest in derivatives, limit a Fund's ability to employ certain strategies that use derivatives and/or adversely affect the value of derivatives and a Fund's performance.

Forward Contracts – A forward contract, also called a "forward", involves a negotiated obligation to purchase or sell a specific security or currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take deferred delivery at a later date of a specified lot of a particular security or currency for a Fund's account. Risks associated with forwards may include: (i) an imperfect correlation between the movement in prices of forward contracts and the securities or currencies underlying them; (ii) an illiquid market for forwards; (iii) difficulty in obtaining an accurate value for the forwards; and (iv) the risk that the counterparty to the forward contract will default or otherwise fail to honor its obligation. Because forwards require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage. Forwards are also subject to credit risk, liquidity risk and leverage risk, each of which is further described elsewhere in this section.

Non-deliverable forwards do not require physical delivery of the currency on the settlement date. Rather, the Fund and the counterparty agree to net the settlement by making a payment in U.S. dollars or another fully convertible

currency that represents any differential between the foreign exchange rate agreed upon at the inception of the non-deliverable forward agreement and the actual exchange rate on the agreed upon future date. Non-deliverable forwards are subject to many of the risks associated with derivatives in general and other forward contracts including risks associated with fluctuation in foreign currency and the risk that the counterparty will fail to fulfill its obligations. The use of non-deliverable forwards for hedging or to increase income or gain may not be successful, resulting in losses to the Fund, and the cost of such strategies may reduce the Fund's returns.

Futures Contracts – Futures contracts, or “futures”, provide for the future sale by one party and purchase by another party of a specified amount of a specific security or asset at a specified future time and at a specified price (with or without delivery required). The risks of futures include: (i) leverage risk; (ii) correlation or tracking risk and (iii) liquidity risk. Because futures require only a small initial investment in the form of a deposit or margin, they involve a high degree of leverage. Accordingly, the fluctuation of the value of futures in relation to the underlying assets upon which they are based is magnified. Thus, a Fund may experience losses that exceed losses experienced by funds that do not use futures contracts and which may be unlimited, depending on the structure of the contract. There may be imperfect correlation, or even no correlation, between price movements of a futures contract and price movements of investments for which futures are used as a substitute, or which futures are intended to hedge.

Lack of correlation (or tracking) may be due to factors unrelated to the value of the investments being substituted or hedged, such as speculative or other pressures on the markets in which these instruments are traded. Consequently, the effectiveness of futures as a security substitute or as a hedging vehicle will depend, in part, on the degree of correlation between price movements in the futures and price movements in underlying securities or assets. While futures contracts are generally liquid instruments, under certain market conditions they may become illiquid. Futures exchanges may impose daily or intra-day price change limits and/or limit the volume of trading.

Additionally, government regulation may further reduce liquidity through similar trading restrictions. As a result, a Fund may be unable to close out its futures contracts at a time that is advantageous. If movements in the markets for security futures contracts or the underlying security decrease the value of a Fund's positions in security futures contracts, the Fund may be required to have or make additional funds available to its carrying firm as margin. If a Fund's account is under the minimum margin requirements set by the exchange or the brokerage firm, its position may be liquidated at a loss, and the Fund will be liable for the deficit, if any, in its account. A Fund may also experience losses due to systems failures or inadequate system

back-up or procedures at the brokerage firm(s) carrying the Fund's positions. The successful use of futures depends upon a variety of factors, particularly the ability of the Adviser to predict movements of the underlying securities markets, which requires different skills than predicting changes in the prices of individual securities. There can be no assurance that any particular futures strategy adopted will succeed.

Options – An option is a contract between two parties for the purchase and sale of an underlying asset such as a security, futures contract (in the case of options on futures contracts), currency or other financial instrument or asset, for a specified price at any time during the option period. In the case of options on futures contracts, unlike a futures contract, an option grants the purchaser, in exchange for a premium payment, a right (not an obligation) to buy or sell a futures contract. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The seller of an uncovered call (buy) option assumes the risk of a theoretically unlimited increase in the market price of the underlying asset above the exercise price of the option. The underlying asset necessary to satisfy the exercise of the call option may be unavailable for purchase except at much higher prices. Purchasing the underlying asset to satisfy the exercise of the call option can itself cause the price of the underlying asset to rise further, sometimes by a significant amount, thereby exacerbating the loss. The buyer of a call option assumes the risk of losing an entire premium invested in the call option without ever getting the opportunity to exercise the option. The seller (writer) of a put (sell) option that is covered (e.g., the writer has a short position in the underlying asset) assumes the risk of an increase in the market price of the underlying asset above the sales price (in establishing the short position) of the underlying asset plus the premium received and gives up the opportunity for gain on the underlying security below the exercise price of the option. The seller of an uncovered put option assumes the risk of a decline in the market price of the underlying asset below the exercise price of the option. The buyer of a put option assumes the risk of losing an entire premium invested in the put option without ever getting the opportunity to exercise the option. An option's time value (i.e., the component of the option's value that exceeds the in-the-money amount) tends to diminish over time. Even though an option may be in-the-money to the buyer at various times prior to its expiration date, the buyer's ability to realize the value of an option depends on when and how the option may be exercised. For example, the terms of a transaction may provide for the option to be exercised automatically if it is in-the-money on the expiration date. Conversely, the terms may require timely delivery of a notice of exercise, and exercise may be subject to other conditions (such as the occurrence or non-occurrence of certain events, such as knock-in, knock-out or other barrier events) and timing requirements, including the "style" of the option.

Swap Agreements – Swaps are agreements whereby two parties agree to exchange payment streams calculated by reference to an underlying asset, such as a rate, index, instrument or securities. Swaps typically involve credit risk, market risk, liquidity risk, funding risk, operational risk, legal and documentation risk, regulatory risk and/or tax risk. Interest rate swaps involve one party, in return for a premium, agreeing to make payments to another party to the extent that interest rates exceed or fall below a specified rate (a “cap” or “floor,” respectively). Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay a Fund and the risk that the Fund will not be able to meet its obligations to the other party to the agreement.

A credit default swap enables a Fund to buy or sell protection against a defined credit event of an issuer or a basket of securities. The buyer of a credit default swap is generally obligated to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation. If a Fund is a seller of protection and a credit event occurs (as defined under the terms of that particular swap agreement), the Fund will generally either: (i) pay to the buyer an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations, or underlying securities comprising a referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising a referenced index. If a Fund is a buyer of protection and a credit event occurs (as defined under the terms of that particular swap agreement), the Fund will either: (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are calculated by market makers considering either industry standard recovery rates or entity specific factors and other considerations until a credit event occurs. If a credit event has occurred, the recovery value is generally determined by a facilitated auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value.

Credit default swaps involve special risks in addition to those mentioned above because they are difficult to value, are highly susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation (as opposed to a credit downgrade or other indication of financial difficulty).

Like a long or short position in a physical security, credit default swaps are subject to the same factors that cause changes in the market value of the underlying asset.

The Dodd-Frank Act, which was signed into law on July 21, 2010, created a new statutory framework that comprehensively regulated the over-the-counter (OTC) derivatives markets for the first time. Key Dodd-Frank Act provisions relating to OTC derivatives require rulemaking by the U.S. Securities and Exchange Commission (the “SEC”) and the U.S. Commodity Futures Trading Commission (the “CFTC”), not all of which has been proposed or finalized as of the date of this prospectus. Prior to the Dodd-Frank Act, the OTC derivatives markets were traditionally traded on a bilateral basis (so-called “bilateral OTC transactions”). Under the Dodd-Frank Act, certain OTC derivatives transactions are now required to be centrally cleared and traded on exchanges or electronic trading platforms called swap execution facilities. Bilateral OTC transactions differ from exchange-traded or cleared derivatives transactions in several respects. Bilateral OTC transactions are transacted directly with dealers and not with a clearing corporation. As bilateral OTC transactions are entered into directly with a dealer, there is a risk of nonperformance by the dealer as a result of its insolvency or otherwise. Under regulations adopted by the CFTC and federal banking regulators (commonly referred to as “Margin Rules”), a Fund is required to post collateral (known as variation margin) to cover the mark-to-market exposure in respect of its uncleared swaps. These rules also mandate that collateral in the form of initial margin be posted to cover potential future exposure attributable to uncleared swap transactions for certain entities, which may include the Funds.

Duration Risk (Opportunistic High Yield Fund only) — Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security’s price to changes in interest rates. For example, if a fixed income security has a five-year duration, it will decrease in value by approximately 5% if interest rates rise 1% and increase in value by approximately 5% if interest rates fall 1%. Fixed income instruments with higher duration typically have higher risk and higher volatility. Longer-term fixed income securities in which a Fund may invest tend to be more volatile than shorter-term fixed income securities. A portfolio with a longer average portfolio duration is typically more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

Emerging Markets Risk (Opportunistic High Yield Fund only) — Emerging market countries are those countries that are: (i) characterized as developing or emerging by any of the World Bank, the United Nations, the International Finance Corporation, or the European Bank for Reconstruction and Development; (ii) included in an emerging markets index by a recognized index provider; or (iii) countries with similar developing or emerging characteristics as countries classified as emerging market countries pursuant to sub-paragraph (i) and (ii) above, in each

case determined at the time of purchase. Emerging market countries may be more likely to experience political turmoil or rapid changes in market or economic conditions than more developed countries. Emerging market countries often have less uniformity in accounting and reporting requirements and unreliable securities valuation. It is sometimes difficult to obtain and enforce court judgments in such countries and there is often a greater potential for nationalization and/or expropriation of assets by the government of an emerging market country. In addition, the financial stability of issuers (including governments) in emerging market countries may be more precarious than in other countries. As a result, there will tend to be an increased risk of price volatility associated with the Fund's investments in emerging market and countries, which may be magnified by currency fluctuations relative to the U.S. dollar. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in a Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses.

Equity Market Risk (Both Funds) — A Fund that invests in equity securities is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of a Fund's securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. In the case of foreign stocks, these fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. These factors contribute to price volatility.

Exchange-Traded Funds (ETFs) Risk (Both Funds) — The risks of owning interests of an ETF generally reflect the same risks as owning the underlying securities or other instruments in which the ETF invests. The shares of certain ETFs may trade at a premium or discount to their intrinsic value (i.e., the market value may differ from the net asset value (NAV) of an ETF's shares). For example, supply and demand for shares of an ETF or market disruptions may cause the market price of the ETF to deviate from the value of the ETF's investments, which may be emphasized in less liquid markets. By investing in an ETF, a Fund indirectly bears the proportionate share of any fees and expenses of the ETF in addition to the fees and expenses that the Fund and its shareholders directly bear in connection with the Fund's operations.

Extension Risk (Opportunistic High Yield Fund only) — Investments in fixed income securities are subject to extension risk. Generally, rising interest rates tend to extend the duration of fixed income securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, the Funds may exhibit additional volatility.

Fixed Income Market Risk (Opportunistic High Yield Fund only) — The prices of a Fund's fixed income securities respond to economic developments, particularly interest rate changes, as well as to perceptions about the creditworthiness of individual issuers, including governments and their agencies. Generally, the value of a Fund's fixed income securities will vary inversely with the direction of prevailing interest rates. Fixed income securities may have fixed-, variable- or floating-rates. There is a risk that the current interest rate on floating and variable rate instruments may not accurately reflect existing market interest rates. Also, longer-term securities are generally more sensitive to changes in the level of interest rates, so the average maturity or duration of these securities affects risk. Changes in government policy, including the Federal Reserve's decisions with respect to raising interest rates or terminating certain programs such as quantitative easing, could increase the risk that interest rates will continue to rise. Rising interest rates may also increase volatility and reduce liquidity in the fixed income markets, and result in a decline in the value of the fixed income investments held by a Fund. In addition, reductions in dealer market-making capacity as a result of structural or regulatory changes could further decrease liquidity and/or increase volatility in the fixed income markets. In the case of foreign securities, price fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. As a result of these market conditions, a Fund's value may fluctuate and/or a Fund may experience increased redemptions from shareholders, which may impact the Fund's liquidity or force the Fund to sell securities into a declining or illiquid market.

Foreign Company Investment Risk (Opportunistic High Yield Fund only) — Investing in issuers located in foreign countries poses distinct risks because political and economic events unique to a country or region will affect those markets and their issuers. These events will not necessarily affect the U.S. economy or similar issuers located in the United States. More specifically, investing in foreign issuers includes risks of adverse changes in foreign economic, political, regulatory and other conditions, changes in currency exchange rates or exchange control regulations (including limitations on currency movements and exchanges), differing accounting, auditing, financial reporting and legal standards and practices, differing securities market structures, and higher transaction costs. In certain countries, legal remedies available to investors may be more limited than those available with respect to investments in the U.S. In addition, the securities of some foreign companies may be less liquid and, at times, more volatile than securities of comparable U.S. companies. A Fund may also experience more rapid or extreme changes in value as compared to a fund that invests solely in securities of U.S. companies because the securities markets of many foreign countries are relatively small and consist of a limited number of companies representing a small number of industries. Investing in foreign issuers also poses the risk that the cost of buying, selling and holding foreign securities, including brokerage, tax and custody costs, may be higher than the costs involved in domestic transactions. In addition,

investments in foreign countries are generally denominated in a foreign currency. As a result, changes in the value of those currencies compared to the U.S. dollar may affect (positively or negatively) the value of a Fund's investments. These currency movements may happen separately from, and in response to, events that do not otherwise affect the value of the security in the issuer's home country. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in a Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses.

High Yield or Below Investment Grade Fixed Income Securities (Junk Bonds) Risk (Opportunistic High Yield Fund only) — High yield fixed income securities are below investment grade fixed income securities (junk bonds) involve greater risk of default or downgrade and are generally more volatile than investment grade securities. Junk bonds also involve greater risk of price declines than investment grade securities due to actual or perceived changes in an issuer's creditworthiness. In addition, issuers of junk bonds may be more susceptible than other issuers to economic downturns. Junk bonds are subject to the risk that the issuer may be unable to pay interest or dividends and ultimately may be unable to repay principal upon maturity. Discontinuation of these payments could substantially adversely affect the market value of the security. The volatility of junk bonds, particularly those issued by foreign governments, is even greater because the prospect for repayment of principal and interest of many of these securities is speculative. Some may even be in default. As an incentive to invest, these risky securities tend to offer higher returns, but there is no guarantee that an investment in these securities will result in a high rate of return.

Interest Rate Risk (Opportunistic High Yield Fund only) — Interest rate risk is the risk that a change in interest rates will cause a fall in the value of fixed income securities, including U.S. Government securities, in which a Fund invests. In a low interest rate environment, the risk of a decline in value of a Fund's portfolio securities associated with rising rates is heightened because there may be a greater likelihood of rates increasing, potentially rapidly. In a declining interest rate environment, a Fund generally will be required to invest cash in instruments with lower interest rates than those of the current portfolio securities. Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, whereas others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources.

Investment Strategy Risk (Both Funds) — Relative value investing focuses on companies with stocks that appear undervalued in light of factors such as the company's earnings, book value, revenues or cash flow. If the Adviser's assessment

of market conditions, or a company's value or prospects for exceeding earnings expectations, is wrong, a Fund could suffer losses or produce poor performance relative to other funds. In addition, "value stocks" can continue to be undervalued by the market for long periods of time.

Investment Style Risk (Both Funds) — Investment style risk is the risk that a Fund's investment in certain securities in a particular market segment pursuant to its particular investment strategy may underperform other market segments or the market as a whole.

Large Capitalization Risk (Opportunistic High Yield Fund only) — If valuations of large capitalization companies appear to be greatly out of proportion to the valuations of small or medium capitalization companies, investors may migrate to the stocks of small and medium-sized companies. Additionally, larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Large Purchase and Redemption Risk (Both Funds) — Large purchases or redemptions of a Fund's shares may affect the Fund, since the Fund may be required to sell portfolio securities if it experiences redemptions, and the Fund will need to invest additional cash that it receives. While it is impossible to predict the overall impact of these transactions over time, there could be adverse effects on Fund management or performance to the extent a Fund may be required to sell securities or invest cash at times when it would not otherwise do so. These transactions could also have tax consequences if sales of securities result in gains, and could also increase transaction costs or portfolio turnover. In addition, a large redemption could result in a Fund's expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Leverage Risk (Opportunistic High Yield Fund only) — Certain Fund transactions, such as borrowing, derivatives and when-issued, delayed delivery or forward commitment transactions, may give rise to a form of leverage. These transactions may expose a Fund to greater risk and increase its costs. As open-end investment companies registered with the SEC, the Funds are subject to the federal securities laws, including the 1940 Act and the rules thereunder. Rule 18f-4 under the 1940 Act requires, among other things, that the Funds either use derivatives in a limited manner or comply with an outer limit on fund leverage risk based on value-at-risk. The use of leverage can amplify the effects of market volatility on a Fund's share price and make the Fund's returns more volatile. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of a Fund's portfolio securities. The use of leverage may also cause a Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. A Fund's use of leverage may result in a heightened risk of investment loss.

Liquidity Risk (Both Funds) — Liquidity risk exists when particular investments are difficult to purchase or sell. The market for certain investments may become illiquid due to specific adverse changes in the condition of a particular issuer or under adverse market or economic conditions independent of the issuer. A Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. Further, transactions in illiquid securities may entail transaction costs that are higher than those for transactions in liquid securities.

Market Risk (Both Funds) — Market risk is the risk that the market value of a security may move up and down, sometimes rapidly and unpredictably. Market risk may affect a single issuer, an industry, a sector or the market as a whole. Markets for securities in which a Fund invests may decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment or publicity. Similarly, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which a Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff.

Master Limited Partnerships (MLPs) Risk (Opportunistic High Yield Fund only) — MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in an MLP also include those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded to investors in a MLP than investors in a corporation. For example, investors in MLPs may have limited voting rights or be liable under certain circumstances for amounts greater than the amount of their investment. In addition, MLPs may be subject to state taxation in certain jurisdictions which will have the effect of reducing the amount of income paid by the MLP to its investors.

Mid-Capitalization Companies Risk (Opportunistic High Yield Fund only) — The risk that mid-capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, mid-capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, mid-capitalization stocks may be more volatile than those of larger companies. Mid-capitalization stocks may be traded over-the-counter or listed on an exchange.

Money Market Instruments Risk (Both Funds) — The value of money market instruments may be affected by changing interest rates and by changes in the credit ratings of the investments. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by any bank, the FDIC or any other government agency. A money market fund's sponsor has no legal obligation to provide financial support to the fund, and there should be no expectation that the sponsor will provide financial support to the fund at any time. Certain money market funds float their net asset value while others seek to preserve the value of investments at a stable net asset value (typically, \$1.00 per share). An investment in a money market fund, even an investment in a fund seeking to maintain a stable net asset value per share, is not guaranteed and it is possible for a Fund to lose money by investing in these and other types of money market funds. Under certain circumstances where a money market fund experiences heightened redemptions, it may be required to impose a mandatory liquidity fee on amounts the Fund redeems from the money market fund (i.e., impose a liquidity fee). In addition, a money market fund may impose a liquidity fee of up to 2% on amounts a Fund redeems from the money market fund during circumstances where the money market fund's board of directors determines such fee would be in the money market fund's best interests. These measures may result in an investment loss. Money market funds and the securities they invest in are subject to comprehensive regulations. The regulations governing money market funds were recently amended in July, 2023, and their implementation and interpretation, as well as enforcement, may affect the manner of operation, performance and/or yield of money market funds.

Mortgage-Backed Securities Risk (Opportunistic High Yield Fund only) — Mortgage-backed securities are a class of asset-backed securities representing an interest in a pool or pools of whole mortgage loans (which may be residential mortgage loans or commercial mortgage loans). Mortgage-backed securities held or acquired by a Fund could include (i) obligations guaranteed by federal agencies of the U.S. Government, such as the Government National Mortgage Association (Ginnie Mae), which are backed by the "full faith and credit" of the United States, (ii) securities issued by the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), which are not backed by the "full faith and credit" of the United States but are guaranteed by the U.S. Government as to timely payment of principal and interest, (iii) securities

(commonly referred to as “private-label RMBS”) issued by private issuers that represent an interest in or are collateralized by whole residential mortgage loans without a government guarantee and (iv) commercial mortgage-backed securities (CMBS), which are multi-class or pass-through securities backed by a mortgage loan or a pool of mortgage loans secured by commercial property such as industrial and warehouse properties, office buildings, retail space and shopping malls, multifamily properties and cooperative apartments. Because private-label RMBS and CMBS are not issued or guaranteed by the U.S. Government, those securities generally are structured with one or more types of credit enhancement. There can be no assurance, however, that credit enhancements will support full payment to a Fund of the principal and interest on such obligations. In addition, changes in the credit quality of the entity that provides credit enhancement could cause losses to a Fund and affect its share price.

A Fund may invest in mortgage-backed securities in the form of debt or in the form of “pass-through” certificates. Pass-through certificates, which represent beneficial ownership interests in the related mortgage loans, differ from debt securities, which generally provide for periodic fixed payments of interest on and principal of the related notes. Mortgage pass-through securities provide for monthly payments that are a “pass-through” of the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans, net of any fees and expenses owed to the servicers of the mortgage loans and other transaction parties that receive payment from collections on the mortgage loans.

The performance of mortgage loans and, in turn, the mortgage-backed securities acquired by a Fund, is influenced by a wide variety of economic, geographic, social and other factors, including general economic conditions, the level of prevailing interest rates, the unemployment rate, the availability of alternative financing and homeowner behavior.

The rate and aggregate amount of distributions on mortgage-backed securities, and therefore the average lives of those securities and the yields realized by a Fund, will be sensitive to the rate of prepayments (including liquidations) and modifications of the related mortgage loans, any losses and shortfalls on the related mortgage loans allocable to the tranches held by the Fund and the manner in which principal payments on the related mortgage loans are allocated among the various tranches in the particular securitization transaction. Furthermore, mortgage-backed securities are sensitive to changes in interest rates, but may respond to those changes differently from other fixed income securities due to the possibility of prepayment of the mortgage loans. Among other factors, a significant amount of defaults, rapid prepayments or prepayment interest shortfalls may erode amounts available for distributions to a Fund. The timing of changes in the rate of prepayments of the mortgage loans may significantly affect a Fund’s actual yield to maturity, even if the average rate of principal payments is consistent with the Fund’s expectations. If prepayments of mortgage loans occur at a rate faster than

that anticipated by a Fund, payments of interest on the mortgage-backed securities could be significantly less than anticipated. Similarly, if the number of mortgage loans that are modified is larger than that anticipated by a Fund, payments of principal and interest on the mortgage-backed securities could be significantly less than anticipated.

Municipal Securities Risk (Opportunistic High Yield Fund only) — Municipal securities are fixed income securities issued by state or local governments or their agencies (such as housing or hospital authorities) to finance capital expenditures and operations. The obligation to pay principal and interest on municipal securities may be a general obligation of the state or local government or may be supported only by an agency or a particular source of revenues. Therefore, municipal securities vary in credit quality. Municipal securities, like other fixed income securities, rise and fall in value in response to economic and market factors, primarily changes in interest rates, and actual or perceived credit quality. Rising interest rates will generally cause municipal securities to decline in value.

Longer-term securities generally respond more sharply to interest rate changes than do shorter-term securities. A municipal security will also lose value if, due to rating downgrades or other factors, there are concerns about the issuer's current or future ability to make principal or interest payments. State and local governments rely on taxes and, to some extent, revenues from private projects financed by municipal securities, to pay interest and principal on municipal debt. Poor statewide or local economic results or changing political sentiments may reduce tax revenues and increase the expenses of municipal issuers, making it more difficult for them to meet their obligations. Actual or perceived erosion of the creditworthiness of municipal issuers may reduce the value of a Fund's holdings. As a result, a Fund will be more susceptible to factors that adversely affect issuers of municipal obligations than a mutual fund that does not have as great of a concentration in municipal obligations. Any changes in the financial condition of municipal issuers also may adversely affect the value of a Fund's securities.

Portfolio Turnover Risk (Both Funds) — Due to its investment strategy, a Fund may buy and sell securities and other instruments frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect a Fund's performance.

Prepayment Risk (Opportunistic High Yield Fund only) — Investments in fixed income securities are subject to prepayment risk. In a declining interest rate environment, fixed income securities with stated interest rates may have their principal paid earlier than expected. This may result in a Fund having to reinvest that money at lower prevailing interest rates, which can reduce the returns of the Fund.

Privately Issued Securities Risk (Opportunistic High Yield Fund only) —

Investment in privately placed securities may be less liquid than in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices realized from these sales could be less than those originally paid by the Fund or less than what may be considered the fair value of such securities. In certain cases, privately placed securities may need to be priced at fair value as determined in good faith pursuant to procedures approved by the Board. Despite such good faith efforts, the Fund's privately placed securities are subject to the risk that the securities' fair value prices may differ from the actual prices that the Fund may ultimately realize upon their sale or disposition. Further, companies whose securities are not publicly traded may not be subject to the disclosure and other investor protection requirements that might be applicable if their securities were publicly traded.

Sector Emphasis Risk (Small Company Equity Fund only) —

The securities of companies in the same business sector, if comprising a significant portion of the Fund's portfolio, may in some circumstances react negatively to market conditions, interest rates and economic, regulatory or financial developments and adversely affect the value of the portfolio to a greater extent than if such securities comprised a lesser portion of the Fund's portfolio or the Fund's portfolio was diversified across a greater number of industry sectors. Some industry sectors have particular risks that may not affect other sectors.

Small Company Risk (Both Funds) —

The risk that small companies in which a Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, stocks of small companies may be more volatile than those of larger companies. Stocks of small companies may be traded over-the-counter or listed on an exchange.

U.S. Government Securities Risk (Opportunistic High Yield Fund only) —

Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources. Therefore, such obligations are not backed by the full faith and credit of the U.S. Government.

Valuation Risk (Both Funds) —

The risk that a security may be difficult to value. The Funds may value certain securities at a price higher than the price at which they can be sold. This risk may be especially pronounced for investments that are illiquid or may become illiquid.

Warrants and Rights Risk (Opportunistic High Yield Fund only) — Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Rights are similar to warrants but typically have a shorter duration and are issued by a company to existing stockholders to provide those holders the right to purchase additional shares of stock at a later date. Warrants and rights may be more speculative than other types of investments. The price of a warrant or right may be more volatile than the price of its underlying security, and a warrant or right may offer greater potential for capital appreciation as well as capital loss. A warrant or right ceases to have value if it is not exercised prior to its expiration date.

When-Issued and Delayed Delivery Securities and Forward Commitments Risk (Opportunistic High Yield Fund only) — When-issued and delayed delivery securities and forward commitments involve the risk that the security a Fund buys will lose value prior to its delivery. There also is the risk that the security will not be issued or that the other party to the transaction will not meet its obligation. If this occurs, the Fund may lose both the investment opportunity for the assets it set aside to pay for the security and any gain in the security's price.

Information About Portfolio Holdings

A description of the Funds' policies and procedures with respect to the circumstances under which the Funds disclose their portfolio holdings is available in the SAI. Each Fund will post its top ten holdings within ten calendar days after the end of each calendar quarter, and its complete portfolio holdings within sixty calendar days after the end of each calendar quarter on the internet at <https://investments.metlife.com/mutual-fund-documents>. The Adviser may exclude any portion of a Fund's portfolio holdings from such publication when deemed in the best interest of the Fund. The portfolio holdings information placed on the Funds' website generally will remain there until such information is included in a filing with the SEC.

Investment Adviser

MetLife Investment Management, LLC, a Delaware limited liability company, serves as the investment adviser to the Funds. The Adviser's principal place of business is located at One MetLife Way, Whippany, New Jersey 07981. As of March 31, 2025, MetLife Investment Management had approximately \$616.9 billion in assets under management.

The Adviser makes investment decisions for the Funds and continuously reviews, supervises and administers each Fund's investment program. The Board oversees the Adviser and establishes policies that the Adviser must follow in its management

activities. For its advisory services to the Funds, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at the following annual rates based on the average daily net assets of each Fund:

Fund	Advisory Fee
MetLife Opportunistic High Yield Fund	0.55%
MetLife Small Company Equity Fund	0.75%

The Adviser has contractually agreed to waive its fees and/or reimburse expenses to the extent necessary to keep total annual Fund operating expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses (collectively, “excluded expenses”)) for Institutional Shares and Investor Shares from exceeding certain levels as set forth below until February 28, 2026 (each, a “contractual expense limit”). This agreement may be terminated by: (i) the Board, for any reason at any time; or (ii) the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2026.

Fund	Contractual Expense Limit
MetLife Opportunistic High Yield Fund	0.75%
MetLife Small Company Equity Fund	0.98%

In addition, the Adviser may receive from a Fund the difference between the total annual fund operating expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the recoupment if at any point total annual fund operating expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment.

For the fiscal year ended September 30, 2024, Mesirow Financial Investment Management, Inc. and Mesirow Institutional Investment Management, Inc., the Funds’ prior investment advisers (collectively, “Mesirow”), received advisory fees (after fee reductions) as a percentage of the average daily net assets of each Fund as follows:

Fund	Advisory Fees Paid
Mesirow Financial Investment Management, Inc.	
MetLife Opportunistic High Yield Fund	0.23%
Mesirow Institutional Investment Management, Inc.	
MetLife Small Company Equity Fund	0.00%

A discussion regarding the basis for the Board's approval of the Adviser's investment advisory agreement will be available in the Funds' reports filed on Form N-CSR for the fiscal year ended September 30, 2025, when available.

Portfolio Managers

The Funds are each managed by a team of investment professionals that are jointly and primarily responsible for the day-to-day management of the Funds.

Robert Sydow, Portfolio Manager, serves as a portfolio manager for the Opportunistic High Yield Fund. Mr. Sydow joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a senior managing director and chief investment officer at Mesirow. Prior to joining Mesirow in 2017, he was a senior vice president at Pacific Income Advisers from 2010 to 2017. Previously, he founded Grandview Capital and served in multiple positions at SunAmerica Investments' High Yield Bond Department. Mr. Sydow also held multiple positions at First Interstate Bancorp and Atlantic Richfield Company. He earned joint undergraduate degrees in Economics and History, graduating summa cum laude, and an M.B.A. and J.D. from UCLA. Mr. Sydow has 37 years of industry experience.

Kevin Buckle, CFA, Portfolio Manager, serves as a portfolio manager for the Opportunistic High Yield Fund. Mr. Buckle joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a senior managing director at Mesirow. Prior to joining Mesirow in 2017, he was a senior vice president at Pacific Income Advisers from 2010 to 2017. Previously, he was a portfolio manager at Grandview Capital and a managing director at Willow Brook Capital, a private equity boutique. He also held multiple positions at SunAmerica Investments, where he co-managed high yield bond, leveraged loan, and structured product portfolios. Mr. Buckle earned a B.S. in Finance and Accounting and an M.B.A. with honors from the University of Southern California. He is a CFA charterholder. Mr. Buckle has 35 years of industry experience.

James Lisko, Portfolio Manager, serves as a portfolio manager for the Opportunistic High Yield Fund. Mr. Lisko joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a senior managing director at Mesirow. Prior to joining Mesirow in 2017, he was a senior vice president at Pacific Income Advisers from 2010 to 2017. Previously, he was a portfolio manager at Grandview Capital, portfolio manager at JPBT Advisors, senior analyst at Western Asset Management and SunAmerica Investments, and a director of research at Papillon Partners. Mr. Lisko earned an undergraduate degree in Finance from the Ohio State University and an M.B.A. from the University of Miami. Mr. Lisko has 32 years of industry experience.

Leo Harmon, CFA, CAIA, Portfolio Manager, serves as a portfolio manager for the Small Company Equity Fund. Mr. Harmon joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a senior managing director at Mesirow.

Prior to joining Mesirow in 2016, he was with FMA from 2003 to 2016. Before that, he was a portfolio manager at Allstate Insurance, Allstate Investments LLC. Mr. Harmon is a CFA charterholder and a member of the CFA Institute, the National Association of Securities Professionals, and the Economics Club of Chicago. He is also a member of the CFA Society of Chicago where he was appointed to the board of directors and served as Chairman. Mr. Harmon also serves as a member of the Board of Trustees for Bradley University. He has served as Chairman on the External Investment Committee for the Office of the Illinois State Treasurer. Mr. Harmon earned a B.S. in Finance from Bradley University and an M.B.A. with a concentration in Finance from the Fuqua School of Business at Duke University. Mr. Harmon has over 30 years of industry experience.

John Nelson, CFA, Portfolio Manager, serves as a portfolio manager for the Small Company Equity Fund. Mr. Nelson joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a managing director at Mesirow. Prior to joining Mesirow in 2016, he was with FMA from 2014 to 2016. Before that, he served as an equity Research Analyst and Portfolio Manager at Gofen and Glossberg as well as an equity Research Analyst at William Blair & Company. Mr. Nelson is a CFA® charterholder, member of the CFA Society of Colorado and the CFA Institute, and earned the FSA Credential from the Sustainability Accounting Standards Board. Mr. Nelson earned a B.A. in political science and international affairs from the University of Nebraska and an M.B.A. with dual concentration in Finance and Accounting from the Kelley School of Business at Indiana University. Mr. Nelson has over 21 years of industry experience.

Eric Jacobsohn, CFA, Portfolio Manager, serves as a portfolio manager for the Small Company Equity Fund. Mr. Jacobsohn joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a managing director at Mesirow. Prior to joining Mesirow in 2017, he was at Calamos Investments where he was responsible for leading the research effort for U.S. cyclicals. He has also served as a buy-side senior equity Research Analyst at Columbia Wanger Investment Management and held an analyst role at Robert W. Baird & Company. Mr. Jacobsohn is a CFA® charterholder, a member of the CFA Society of Chicago and the CFA Institute and earned the FSA Credential from the Sustainability Accounting Standards Board. Mr. Jacobsohn earned a B.B.A. in Finance and Real Estate from the University of Wisconsin - Madison, and an M.B.A. from the University of Chicago Booth School of Business. Mr. Jacobsohn has over 20 years of industry experience.

Andrew Hadland, CFA, Portfolio Manager, serves as a portfolio manager for the Small Company Equity Fund. Mr. Hadland joined the Adviser on February 28, 2025. Prior to joining the Adviser, he was a managing director at Mesirow. Prior to joining Mesirow in 2016, he was with FMA. Prior to joining FMA, Mr. Hadland served as a Senior Equity Analyst at The Northern Trust Company and a Senior Analyst and Co-Portfolio Manager at Conseco Capital Management. Mr. Hadland earned a B.S. in Finance from Miami of Ohio University and an M.B.A. with dual concentration

in Finance and Equity Valuation from the Kelley School of Business at Indiana University. Mr. Hadland is a CFA charterholder and member of the CFA Society of Chicago and CFA Institute. Mr. Hadland has over 27 years of industry experience.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of Fund shares.

Purchasing, Selling and Exchanging Fund Shares

This section tells you how to purchase, sell (sometimes called “redeem”) and exchange shares of the Funds.

For information regarding the federal income tax consequences of transactions in shares of the Funds, including information about cost basis reporting, see “Taxes.”

How to Choose a Share Class

Each Fund offers two classes of shares, Institutional Shares and Investor Shares, to both individual and institutional investors. Each share class has its own investment minimums and cost structure, as summarized below. Contact your financial intermediary or the Funds for more information about each Fund's share classes and how to choose between them.

Fund Name	Class Name	Investment Minimums	Fees
Opportunistic High Yield Fund	Institutional Shares	Initial - \$1,000,000 Subsequent - None	No Rule 12b-1 Fee Shareholder Servicing Fee of up to 0.15%
	Investor Shares	Initial - \$5,000 Subsequent - None	0.25% Rule 12b-1 Fee Shareholder Servicing Fee of up to 0.15%
Small Company Equity Fund	Institutional Shares	Initial - \$100,000 Subsequent - None	No Rule 12b-1 Fee Shareholder Servicing Fee of up to 0.15%
	Investor Shares	Initial - \$5,000 Subsequent - None	0.25% Rule 12b-1 Fee Shareholder Servicing Fee of up to 0.15%

Institutional Shares and Investor Shares are offered to investors who purchase shares directly from the Funds or through certain financial intermediaries such as financial planners, investment advisors, broker-dealers or other financial institutions. An investor may be eligible to purchase more than one share class. However, if you

purchase shares through a financial intermediary, you may only purchase that class of shares which your financial intermediary sells or services. Your financial intermediary can tell you which class of shares is available through the intermediary.

The Funds reserve the right to accept investments of smaller amounts in their sole discretion.

How to Purchase Fund Shares

To purchase shares directly from the Funds through their transfer agent, complete and send in the application. If you need an application or have questions, please call 800-252-4993.

All investments must be made by check, Automated Clearing House ("ACH"), or wire. All checks must be made payable in U.S. dollars and drawn on U.S. financial institutions. The Funds do not accept purchases made by third-party checks, credit cards, credit card checks, cash, traveler's checks, money orders or cashier's checks.

The Funds reserve the right to reject any specific purchase order, including exchange purchases, for any reason. The Funds are not intended for short-term trading by shareholders in response to short-term market fluctuations. For more information about the Funds' policy on short-term trading, see "Excessive Trading Policies and Procedures."

The Funds do not generally accept investments by non-U.S. persons. Non-U.S. persons may be permitted to invest in the Funds subject to the satisfaction of enhanced due diligence. Please contact the Funds for more information.

By Mail

You can open an account with the Funds by sending a check and your account application to the address below. You can add to an existing account by sending the Funds a check and, if possible, the "Invest by Mail" stub that accompanies your confirmation statement. Be sure your check identifies clearly your name, your account number, the Fund name and the share class.

Regular Mail Address

MetLife Funds
P.O. Box 219009
Kansas City, MO 64121-9009

Express Mail Address

MetLife Funds
c/o SS&C Global Investor & Distribution Solutions, Inc.
801 Pennsylvania Avenue
Suite 219009
Kansas City, MO 64105-1307

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services of purchase orders does not constitute receipt by the Funds' transfer agent. The share price used to fill the purchase order is the next price calculated by a Fund after the Funds' transfer agent receives and accepts the order in good order at the P.O. Box provided for regular mail delivery or the office address provided for express mail delivery.

By Wire

To open an account by wire, call 800-252-4993 for details. To add to an existing account by wire, wire your money using the wiring instructions set forth below (be sure to include the Fund name, the share class and your account number). The share price used to fill the purchase order is the next price calculated by a Fund after the Funds' transfer agent receives and accepts the wire in good order.

Purchases In-Kind

Subject to the approval of the Funds, an investor may purchase shares of a Fund with liquid securities and other assets that are eligible for purchase by the Fund (consistent with the Fund's investment policies and restrictions) and that have a value that is readily ascertainable in accordance with the valuation procedures used by the Funds. These transactions will be effected only if the Adviser deems the security to be an appropriate investment for a Fund. Assets purchased by a Fund in such transactions will be valued in accordance with the valuation procedures used by the Funds. The Funds reserve the right to amend or terminate this practice at any time.

Minimum Purchases

To purchase Institutional Shares of the Opportunistic High Yield Fund for the first time, you must invest at least \$1,000,000. To purchase Institutional Shares of the Small Company Equity Fund for the first time, you must invest at least \$100,000. To purchase Investor Shares of each Fund for the first time, you must invest at least \$5,000. There is no minimum for subsequent investments. The Funds may accept investments of smaller amounts in their sole discretion.

By Systematic Investment Plan (via ACH)

You may not open an account via ACH. However, once you have established a direct account with the Funds, you can set up an automatic investment plan via ACH by mailing a completed application to the Funds. These purchases can be made monthly, quarterly, semi-annually or annually in amounts of at least \$1,000 for Institutional Shares and Investor Shares. To cancel or change a plan, contact the Fund by mail at: MetLife Funds, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: MetLife Funds, c/o SS&C Global Investor & Distribution Solutions, Inc., 801 Pennsylvania Avenue, Suite 219009, Kansas City, MO 64105-1307). Please allow up to 15 days to create the plan and 3 days to cancel or change it.

Fund Codes

The Funds' reference information, which is listed below, will be helpful to you when you contact the Fund to purchase or exchange shares, check daily NAV, or obtain additional information.

Fund Name	Share Class	Ticker Symbol	CUSIP	Fund Code
Opportunistic High Yield Fund	Institutional Shares	MFHIX	00774Q 783	2676
	Investor Shares	MFHVX	00774Q 775	2677
Small Company Equity Fund	Institutional Shares	MSVIX	00774Q 767	2672
	Investor Shares	MSVVX	00774Q 759	2673

General Information

You may generally purchase shares on any day that the NYSE is open for business (a "Business Day"). Shares cannot be purchased by Federal Reserve wire on days that either the NYSE or the Federal Reserve is closed.

A Fund's price per share will be the next determined net asset value ("NAV") per share after the Fund or an authorized institution (as defined below) receives and accepts your purchase order in good order. "Good order" means that the Fund was provided with a complete and signed account application, including the investor's social security number or tax identification number, and other identification required by law or regulation, as well as sufficient purchase proceeds. Purchase orders that are not in good order cannot be accepted and processed even if money to purchase shares has been submitted by wire, check or ACH.

Each Fund calculates its NAV once each Business Day as of the close of normal trading on the NYSE (normally, 4:00 p.m., Eastern Time). To receive the current Business Day's NAV, a Fund or an authorized institution must receive and accept your purchase order in good order before the close of normal trading on the

NYSE. If your purchase order is not received and accepted in good order before the close of normal trading on the NYSE, you will receive the NAV calculated on the subsequent Business Day on which your order is received and accepted in good order. If the NYSE closes early, as in the case of scheduled half-day trading or unscheduled suspensions of trading, the Funds reserve the right to calculate NAV as of the earlier closing time. The Funds will not accept orders that request a particular day or price for the transaction or any other special conditions. Shares will only be priced on Business Days. Since securities that are traded on foreign exchanges may trade on days that are not Business Days, the value of a Fund's assets may change on days when you are unable to purchase or redeem shares.

Buying or Selling Shares through a Financial Intermediary

In addition to being able to buy and sell Fund shares directly from the Funds through their transfer agent, you may also buy or sell shares of a Fund through accounts with financial intermediaries, such as brokers and other institutions that are authorized to place trades in Fund shares for their customers. When you purchase or sell Fund shares through a financial intermediary (rather than directly from a Fund), you may have to transmit your purchase and sale requests to the financial intermediary at an earlier time for your transaction to become effective that day. This allows the financial intermediary time to process your requests and transmit them to the Fund prior to the time the Fund calculates its NAV that day. Your financial intermediary is responsible for transmitting all purchase and redemption requests, investment information, documentation and money to a Fund on time. If your financial intermediary fails to do so, it may be responsible for any resulting fees or losses. Unless your financial intermediary is an authorized institution, orders transmitted by the financial intermediary and received by a Fund after the time NAV is calculated for a particular day will receive the following day's NAV.

Certain financial intermediaries, including certain broker-dealers and shareholder organizations, are authorized to act as agent on behalf of the Funds with respect to the receipt of purchase and redemption orders for Fund shares ("authorized institutions"). Authorized institutions are also authorized to designate other intermediaries to receive purchase and redemption orders on a Fund's behalf. A Fund will be deemed to have received a purchase or redemption order when an authorized institution or, if applicable, an authorized institution's designee, receives the order. Orders will be priced at a Fund's next computed NAV after they are received by an authorized institution or an authorized institution's designee. To determine whether your financial intermediary is an authorized institution or an authorized institution's designee such that it may act as agent on behalf of a Fund with respect to purchase and redemption orders for Fund shares, you should contact your financial intermediary directly.

If you deal directly with a financial intermediary, you will have to follow its procedures for transacting with a Fund. Your financial intermediary may charge a fee for your purchase and/or redemption transactions. For more information about how to purchase or sell Fund shares through a financial intermediary, you should contact your financial intermediary directly.

How the Funds Calculate NAV

The NAV of a class of a Fund's shares is determined by dividing the total value of the Fund's portfolio investments and other assets attributable to the class, less any liabilities attributable to the class, by the total number of shares outstanding of the class.

In calculating NAV, each Fund generally values its investment portfolio at market price. If market prices are not readily available or they are unreliable, such as in the case of a security value that has been materially affected by events occurring after the relevant market closes, securities are valued at fair value. The Board has designated the Adviser as the Funds' valuation designee to make all fair value determinations with respect to the Funds' portfolio investments, subject to the Board's oversight. The Adviser has adopted and implemented policies and procedures to be followed when making fair value determinations, and it has established a Valuation Committee through which the Adviser makes fair value determinations. The Adviser's determination of a security's fair value price often involves the consideration of a number of subjective factors, and is therefore subject to the unavoidable risk that the value that is assigned to a security may be higher or lower than the security's value would be if a reliable market quotation for the security was readily available.

With respect to non-U.S. securities held by a Fund, the Adviser may take factors influencing specific markets or issuers into consideration in determining the fair value of a non-U.S. security. International securities markets may be open on days when the U.S. markets are closed. In such cases, the value of any international securities owned by a Fund may be significantly affected on days when investors cannot buy or sell shares. In addition, due to the difference in times between the close of the international markets and the time as of which the Fund prices its shares, the value the Adviser assigns to securities may not be the same as the quoted or published prices of those securities on their primary markets or exchanges. In determining fair value prices, the Adviser may consider the performance of securities on their primary exchanges, foreign currency appreciation/depreciation, securities market movements in the United States, or other relevant information related to the securities.

There may be limited circumstances in which the Adviser would price securities at fair value for stocks of U.S. companies that are traded on U.S. exchanges – for example, if the exchange on which a portfolio security is principally traded closed early or if trading in a particular security was halted during the day and did not resume prior to the time a Fund calculated its NAV.

When valuing fixed income securities with remaining maturities of more than 60 days, a Fund uses the value of the security provided by pricing services. The values provided by a pricing service may be based upon market quotations for the same security, securities expected to trade in a similar manner or a pricing matrix. When valuing fixed income securities with remaining maturities of 60 days or less, the Fund may use the security's amortized cost. Amortized cost and the use of a pricing matrix in valuing fixed income securities are forms of fair value pricing.

Other assets held by the Funds for which market quotations are not readily available will be valued at their fair value as determined in good faith by the Adviser, subject to Board oversight.

How to Sell Your Fund Shares

If you own your shares directly, you may sell your shares on any Business Day by contacting the Funds directly by mail or telephone at 800-252-4993.

If you own your shares through an account with a broker or other institution, contact that broker or institution to sell your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Funds.

If you would like to have your redemption proceeds, including proceeds generated as a result of closing your account, sent to a third party or an address other than your own, please notify the Funds in writing.

Certain redemption requests will require a signature guarantee by an eligible guarantor institution. Eligible guarantors include commercial banks, savings and loans, savings banks, trust companies, credit unions, member firms of a national stock exchange, or any other member or participant of an approved signature guarantor program. For example, signature guarantees may be required if your address of record has changed in the last 30 days, if you want the proceeds sent to a bank other than the bank of record on your account, or if you ask that the proceeds be sent to a different person or address. Please note that a notary public is not an acceptable provider of a signature guarantee and that a Fund must be provided with the original guarantee. Signature guarantees are for the protection of Fund shareholders. Before granting a redemption request, the Fund may require a shareholder to furnish additional legal documents to ensure proper authorization.

Accounts held by a corporation, trust, fiduciary or partnership, may require additional documentation along with a signature guaranteed letter of instruction. The Funds participate in the Paperless Legal Program (the "Program"), which eliminates

the need for accompanying paper documentation on legal securities transfers. Requests received with a Medallion Signature Guarantee will be reviewed for the proper criteria to meet the guidelines of the Program and may not require additional documentation. Please contact Shareholder Services at 800-252-4993 for more information.

The sale price of each share will be the next determined NAV after a Fund (or an authorized institution) receives and accepts your request in good order.

By Mail

To redeem shares by mail, please send a letter to the Funds signed by all registered parties on the account specifying:

- The Fund name;
- The share class;
- The account number;
- The dollar amount or number of shares you wish to redeem;
- The account name(s); and
- The address to which redemption (sale) proceeds should be sent.

All registered shareholders must sign the letter in the exact name(s) and must designate any special capacity in which they are registered.

Regular Mail Address

MetLife Funds
P.O. Box 219009
Kansas City, MO 64121-9009

Express Mail Address

MetLife Funds
c/o SS&C Global Investor & Distribution Solutions, Inc.
801 Pennsylvania Avenue
Suite 219009
Kansas City, MO 64105-1307

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services of sell orders does not constitute receipt by the Funds' transfer agent. The share price used to fill the sell order is the next price calculated by a Fund after the Funds' transfer agent receives and accepts the order in good order at the P.O. Box provided for regular mail delivery or the office address provided for express mail delivery.

By Telephone

To redeem shares by telephone, you must first establish the telephone redemption privilege (and, if desired, the wire and/or ACH redemption privilege) by completing the appropriate sections of the account application. Call 800-252-4993 to redeem your shares. Based on your instructions, the Funds will mail your proceeds to you, or send them to your bank via wire or ACH.

By Systematic Withdrawal Plan (via ACH)

If you have a direct account with the Funds, you may transfer as little as \$1,000 per month for Institutional Shares and Investor Shares from your account to another financial institution through a Systematic Withdrawal Plan (via ACH). The minimum balance requirements may be modified by a Fund in its sole discretion. To participate in this service, you must complete the appropriate sections of the account application and mail it to the Funds.

Receiving Your Money

Normally, a Fund will send your sale proceeds within one Business Day after it receives your redemption request. A Fund, however, may take up to seven days to pay redemption proceeds. Your proceeds can be wired to your bank account (may be subject to a \$10 fee), sent to you by check or sent via ACH to your bank account if you have established banking instructions with a Fund. **If you are selling shares that were recently purchased by check or through ACH, redemption proceeds may not be available until your check has cleared or the ACH transaction has been completed (which may take up to 15 days from your date of purchase).**

A Fund typically expects to sell portfolio assets and/or hold cash or cash equivalents to meet redemption requests. On a less regular basis, a Fund may also meet redemption requests by using short-term borrowings from its custodian and/or redeeming shares in-kind (as described below). These methods may be used during both normal and stressed market conditions.

Redemptions In-Kind

The Funds generally pay sale (redemption) proceeds in cash. However, under unusual conditions that make the payment of cash unwise and for the protection of the Funds' remaining shareholders, the Funds might pay all or part of your redemption proceeds in securities with a market value equal to the redemption price (redemption in-kind). It is highly unlikely that your shares would ever be redeemed in-kind, but if they were, you would have to pay transaction costs to sell the securities distributed to you, as well as taxes on any capital gains from the sale as with any redemption. In addition, you would continue to be subject to the risks of any market fluctuation in the value of the securities you receive in-kind until they are sold.

Involuntary Redemptions of Your Shares

If your account balance drops below \$100,000 for Institutional Shares or \$2,500 for Investor Shares of a Fund, you may be required to sell your shares. The Funds generally will provide you at least 30 days' written notice to give you time to add to your account and avoid the involuntary redemption of your shares. Each Fund reserves the right to waive the minimum account value requirement in its sole discretion. If your shares are redeemed for this reason within 90 days of their purchase, the redemption fee will not be applied.

Suspension of Your Right to Sell Your Shares

The Funds may suspend your right to sell your shares or delay payment of redemption proceeds for more than seven days during times when the NYSE is closed, other than during customary weekends or holidays, or as otherwise permitted by the SEC. More information about this is in the SAI.

How to Exchange Your Fund Shares

At no charge, you may exchange Institutional Shares or Investor Shares of any Fund for Institutional Shares or Investor Shares, respectively, of another Fund by writing to or calling the Funds. Exchanges are subject to the minimum investment requirements and the fees and expenses of the Fund you exchange into. (The Funds may accept investments of smaller amounts in their sole discretion). You may only exchange shares between accounts with identical registrations (i.e., the same names and addresses).

The exchange privilege is not intended as a vehicle for short-term or excessive trading. A Fund may suspend or terminate your exchange privilege if you engage in a pattern of exchanges that is excessive, as determined in the sole discretion of the Fund. For more information about the Funds' policy on excessive trading, see "Excessive Trading Policies and Procedures."

Telephone Transactions

Purchasing, selling and exchanging Fund shares over the telephone is extremely convenient, but not without risk. Although the Funds have certain safeguards and procedures to confirm the identity of callers and the authenticity of instructions, the Funds are not responsible for any losses or costs incurred by following telephone instructions they reasonably believe to be genuine. If you or your financial institution transact with the Funds over the telephone, you will generally bear the risk of any loss.

Payments to Financial Intermediaries

The Funds and/or the Adviser may compensate financial intermediaries for providing a variety of services to the Funds and/or their shareholders. Financial intermediaries include affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Funds, their service providers or their respective affiliates. This section briefly describes how financial intermediaries may be paid for providing these services. For more information please see "Payments to Financial Intermediaries" in the SAI.

Distribution Plan

The Funds have adopted a distribution plan under Rule 12b-1 of the Investment Company Act of 1940, as amended, for Investor Shares that allows the Funds to pay distribution and/or service fees for the sale and distribution of Fund shares, and for services provided to shareholders. Because these fees are paid out of a Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. The maximum annual Rule 12b-1 fee for Investor Shares of a Fund is 0.25%.

Shareholder Servicing Plan

The Funds have adopted a shareholder servicing plan that provides that the Funds may pay financial intermediaries for shareholder services in an annual amount not to exceed 0.15% based on the average daily net assets of the Funds' Institutional Shares and Investor Shares. The services for which financial intermediaries are compensated may include record-keeping, transaction processing for shareholders' accounts and other shareholder services.

Payments by the Adviser

From time to time, the Adviser and/or its affiliates, in their discretion, may make payments to certain affiliated or unaffiliated financial intermediaries to compensate them for the costs associated with distribution, marketing, administration and shareholder servicing support for the Funds. These payments are sometimes characterized as "revenue sharing" payments and are made out of the Adviser's and/or its affiliates' own legitimate profits or other resources, and may be in addition to any payments made to financial intermediaries by the Funds. A financial intermediary may provide these services with respect to Fund shares sold or held through programs such as retirement plans, qualified tuition programs, fund supermarkets, fee-based advisory or wrap fee programs, bank trust programs, and insurance (e.g., individual or group annuity) programs. In addition, financial intermediaries may receive payments for making shares of the Funds available to their customers or registered representatives, including providing the Funds with

“shelf space,” placing them on a preferred or recommended fund list, or promoting the Funds in certain sales programs that are sponsored by financial intermediaries. To the extent permitted by SEC and Financial Industry Regulatory Authority (“FINRA”) rules and other applicable laws and regulations, the Adviser and/or its affiliates may pay or allow other promotional incentives or payments to financial intermediaries.

The level of payments made by the Adviser and/or its affiliates to individual financial intermediaries varies in any given year and may be negotiated on the basis of sales of Fund shares, the amount of Fund assets serviced by the financial intermediary or the quality of the financial intermediary’s relationship with the Adviser and/or its affiliates. These payments may be more or less than the payments received by the financial intermediaries from other mutual funds and may influence a financial intermediary to favor the sales of certain funds or share classes over others. In certain instances, the payments could be significant and may cause a conflict of interest for your financial intermediary. Any such payments will not change the NAV or price of a Fund’s shares. Please contact your financial intermediary for information about any payments it may receive in connection with the sale of Fund shares or the provision of services to Fund shareholders.

In addition to these payments, your financial intermediary may charge you account fees, commissions or transaction fees for buying or redeeming shares of the Funds, or other fees for servicing your account. Your financial intermediary should provide a schedule of its fees and services to you upon request.

Other Policies

Excessive Trading Policies and Procedures

The Funds are intended for long-term investment purposes only and discourage shareholders from engaging in “market timing” or other types of excessive short-term trading. This frequent trading into and out of a Fund may present risks to the Fund’s long-term shareholders and could adversely affect shareholder returns. The risks posed by frequent trading include interfering with the efficient implementation of a Fund’s investment strategies, triggering the recognition of taxable gains and losses on the sale of Fund investments, requiring the Fund to maintain higher cash balances to meet redemption requests, and experiencing increased transaction costs.

In addition, because certain of the Funds may invest in foreign securities traded primarily on markets that close prior to the time a Fund determines its NAV, the risks posed by frequent trading may have a greater potential to dilute the value of Fund shares held by long-term shareholders than funds investing exclusively in U.S. securities. In instances where a significant event that affects the value of one or more foreign securities held by a Fund takes place after the close of

the primary foreign market, but before the time that the Fund determines its NAV, certain investors may seek to take advantage of the fact that there will be a delay in the adjustment of the market price for a security caused by this event until the foreign market reopens (sometimes referred to as “price” or “time zone” arbitrage). Shareholders who attempt this type of arbitrage may dilute the value of a Fund’s shares if the prices of the Fund’s foreign securities do not reflect their fair value. Although the Adviser has procedures designed to determine the fair value of foreign securities for purposes of calculating the applicable Funds’ NAV when such an event has occurred, fair value pricing, because it involves judgments which are inherently subjective, may not always eliminate the risk of price arbitrage.

In addition, because the Funds may invest in small-cap securities, which often trade in lower volumes and may be less liquid, the Funds may be more susceptible to the risks posed by frequent trading because frequent transactions in the Funds’ shares may have a greater impact on the market prices of these types of securities.

The Funds’ service providers will take steps reasonably designed to detect and deter frequent trading by shareholders pursuant to the Funds’ policies and procedures described in this prospectus and approved by the Board. For purposes of applying these policies, the Funds’ service providers may consider the trading history of accounts under common ownership or control. The Funds’ policies and procedures include:

- Shareholders are restricted from making more than 4 “round trips,” including exchanges, into or out of a Fund over any rolling 12 month period. If a shareholder exceeds this amount, the Fund and/or its service providers may, at their discretion, reject any additional purchase or exchange orders. The Funds define a “round trip” as a purchase or exchange into a Fund by a shareholder, followed by a subsequent redemption out of the Fund, of an amount the Adviser reasonably believes would be harmful or disruptive to the Fund(s) they manage.
- A redemption fee of 1.00% of the value of shares sold will be imposed on Fund shares redeemed within 90 days or less after their date of purchase (subject to certain exceptions as discussed below in “Redemption Fee”).
- Each Fund reserves the right to reject any purchase or exchange request by any investor or group of investors for any reason without prior notice, including, in particular, if the Fund or the Adviser reasonably believes that the trading activity would be harmful or disruptive to the Fund(s) they manage.

The Funds and/or their service providers seek to apply these policies to the best of their abilities uniformly and in a manner they believe is consistent with the interests of the Funds’ long-term shareholders. The Funds do not knowingly accommodate frequent purchases and redemptions by Fund shareholders. Although these policies are designed to deter frequent trading, none of these measures alone nor all of them taken together eliminate the possibility that frequent trading in a Fund will occur. Systematic purchases and redemptions are exempt from these policies.

Financial intermediaries (such as investment advisers and broker-dealers) often establish omnibus accounts in the Funds for their customers through which transactions are placed. The Funds have entered into “information sharing agreements” with these financial intermediaries, which permit the Funds to obtain, upon request, information about the trading activity of the intermediary’s customers that invest in the Funds. If the Funds or their service providers identify omnibus account level trading patterns that have the potential to be detrimental to the Funds, the Funds or their service providers may, in their sole discretion, request from the financial intermediary information concerning the trading activity of its customers. Based upon a review of that information, if the Funds or their service providers determine that the trading activity of any customer may be detrimental to the Funds, they may, in their sole discretion, request the financial intermediary to restrict or limit further trading in the Funds by that customer. If the Funds are not satisfied that the intermediary has taken appropriate action, the Funds may terminate the intermediary’s ability to transact in Fund shares. When information regarding transactions in the Funds’ shares is requested by the Funds and such information is in the possession of a person that is itself a financial intermediary to a financial intermediary (an “indirect intermediary”), any financial intermediary with whom the Funds have an information sharing agreement is obligated to obtain transaction information from the indirect intermediary or, if directed by the Funds, to restrict or prohibit the indirect intermediary from purchasing shares of the Funds on behalf of other persons.

The Funds and their service providers will use reasonable efforts to work with financial intermediaries to identify excessive short-term trading in omnibus accounts that may be detrimental to the Funds. However, there can be no assurance that the monitoring of omnibus account level trading will enable the Funds to identify or prevent all such trading by a financial intermediary’s customers. Please contact your financial intermediary for more information.

Redemption Fee

In an effort to discourage short-term trading and defray costs incurred by shareholders as a result of short-term trading, each Fund charges a 1.00% redemption fee on redemptions (including exchanges) of shares that have been held for less than 90 days. The redemption fee is deducted from a Fund’s sale proceeds and cannot be paid separately, and any proceeds of the fee are credited to the assets of the Fund from which the redemption was made. The fee does not apply to shares purchased with reinvested dividends or distributions. In determining how long shares of a Fund have been held, the Fund assumes that shares held by the investor the longest period of time will be sold first.

The redemption fee is applicable to Fund shares purchased either directly from a Fund or through a financial intermediary, such as a broker-dealer. Transactions through financial intermediaries typically are placed with the Fund on an omnibus

basis and include both purchase and sale transactions placed on behalf of multiple investors. The Funds request that financial intermediaries assess the redemption fee on customer accounts and collect and remit the proceeds to the Funds. However, the Funds recognize that due to operational and systems limitations, intermediaries' methods for tracking and calculating the fee may be inadequate or differ in some respects from the Funds'. Therefore, to the extent that financial intermediaries are unable to collect the redemption fee, a Fund may not be able to defray the expenses associated with those short-term trades made by that financial intermediary's customers.

Each Fund reserves the right to waive its redemption fee at its discretion when it believes such waiver is in the best interests of the Fund, including with respect to certain categories of redemptions that the Fund reasonably believes may not raise frequent trading or market timing concerns. These categories currently include, but are not limited to, the following: (i) participants in certain group retirement plans whose processing systems are incapable of properly applying the redemption fee to underlying shareholders; (ii) redemptions resulting from certain transfers upon the death of a shareholder; (iii) redemptions by certain pension plans as required by law or by regulatory authorities; (iv) systematic withdrawals; and (v) retirement loans and withdrawals.

Customer Identification and Verification

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account.

What this means to you: When you open an account, a Fund will ask your name, address, date of birth, and other information that will allow the Fund to identify you. This information is subject to verification to ensure the identity of all persons opening a mutual fund account.

The Funds are required by law to reject your new account application if the required identifying information is not provided.

In certain instances, the Funds are required to collect documents to fulfill their legal obligation. Documents provided in connection with your application will be used solely to establish and verify your identity.

Attempts to collect the missing information required on the application will be performed by either contacting you or, if applicable, your broker or financial intermediary. If this information cannot be obtained within a reasonable timeframe established in the sole discretion of the Funds, your application will be rejected.

Subject to each Fund's right to reject purchases as described in this prospectus, upon receipt of your application in good order (or upon receipt of all identifying information required on the application), your investment will be accepted and your order will be processed at the next-determined NAV per share.

The Funds reserve the right to close or liquidate your account at the next-determined NAV and remit proceeds to you via check if they are unable to verify your identity. Attempts to verify your identity will be performed within a reasonable timeframe established in the sole discretion of the Funds. Further, the Funds reserve the right to hold your proceeds until your original check clears the bank, which may take up to 15 days from the date of purchase. In such an instance, you may be subject to a gain or loss on Fund shares and will be subject to corresponding tax implications.

Anti-Money Laundering Program

Customer identification and verification is part of the Funds' overall obligation to deter money laundering under federal law. The Funds have adopted an anti-money laundering compliance program designed to prevent the Funds from being used for money laundering or the financing of illegal activities. In this regard, the Funds reserve the right to: (i) refuse, cancel or rescind any purchase or exchange order; (ii) freeze any account and/or suspend account services; or (iii) involuntarily close your account in cases of threatening conduct or suspected fraudulent or illegal activity. These actions will be taken when, in the sole discretion of Fund management, they are deemed to be in the best interest of a Fund or in cases when a Fund is requested or compelled to do so by governmental or law enforcement authority. If your account is closed at the request of governmental or law enforcement authority, you may not receive proceeds of the redemption if the Fund is required to withhold such proceeds.

Unclaimed Property

Each state has unclaimed property rules that generally provide for escheatment (or transfer) to the state of unclaimed property under various circumstances. Such circumstances include inactivity (e.g., no owner-initiated contact for a certain period), returned mail (e.g., when mail sent to a shareholder is returned by the post office, or "RPO," as undeliverable), or a combination of both inactivity and returned mail. Once it flags property as unclaimed, the applicable Fund will attempt to contact the shareholder, but if that attempt is unsuccessful, the account may be considered abandoned and escheated to the state.

Shareholders that reside in the state of Texas may designate a representative to receive escheatment notifications by completing and submitting a designation form that can be found on the website of the Texas Comptroller. While the designated representative does not have any rights to claim or access the shareholder's account or assets, the escheatment period will cease if the representative communicates knowledge of the shareholder's location and confirms that the shareholder has not

abandoned his or her property. A completed designation form may be mailed to the Funds (if shares are held directly with the Funds) or to the shareholder's financial intermediary (if shares are not held directly with the Funds).

More information on unclaimed property and how to maintain an active account is available through your state or by calling 800-252-4993.

Dividends and Distributions

The Opportunistic High Yield Fund distributes its net investment income monthly and makes distributions of its net realized capital gains, if any, at least annually. The Small Company Equity Fund distributes its net investment income, and makes distributions of its net realized capital gains, if any, at least annually. If you own Fund shares on a Fund's record date, you will be entitled to receive the distribution.

You will receive dividends and distributions in the form of additional Fund shares unless you elect to receive payment in cash. To elect cash payment, you must notify a Fund in writing prior to the date of the distribution. Your election will be effective for dividends and distributions paid after the Fund receives your written notice. To cancel your election, simply send the Fund written notice.

Taxes

Please consult your tax advisor regarding your specific questions about U.S. federal, state and local income taxes. Below is a summary of certain important tax issues that affect the Funds and their shareholders. This summary is based on current tax laws, which may change. This summary does not apply to shares held in an IRA or other tax-qualified plans, which are generally not subject to current tax. Transactions relating to shares held in such accounts may, however, be taxable at some time in the future.

Each Fund has elected and intends to qualify each year for treatment as a RIC under the Code. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, a Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Each Fund intends to distribute substantially all of its net investment income and net realized capital gains, if any. The dividends and distributions you receive may be subject to federal, state, and local taxation, depending upon your tax situation. Distributions you receive from each Fund may be taxable whether or not you reinvest them. Income distributions, other than distributions of qualified dividend income, and distributions of short-term capital gains are generally taxable at ordinary income tax rates. Distributions reported by the Funds as long-term capital

gains and as qualified dividend income are generally taxable at the rates applicable to long-term capital gains currently set at a maximum tax rate for individuals at 20% (lower rates apply to individuals in lower tax brackets). A Fund's investment strategies may limit its ability to make distributions eligible for treatment as qualified dividend income. Once a year the Funds (or their administrative agent) will send you a statement showing the types and total amount of distributions you received during the previous year.

A RIC that receives business interest income may pass through its net business interest income for purposes of the tax rules applicable to the interest expense limitations under Section 163(j) of the Code. A RIC's total "Section 163(j) Interest Dividend" for a tax year is limited to the excess of the RIC's business interest income over the sum of its business interest expense and its other deductions properly allocable to its business interest income. A RIC may, in its discretion, designate all or a portion of ordinary dividends as Section 163(j) Interest Dividends, which would allow the recipient shareholder to treat the designated portion of such dividends as interest income for purposes of determining such shareholder's interest expense deduction limitation under Section 163(j). This can potentially increase the amount of a shareholder's interest expense deductible under Section 163(j). In general, to be eligible to treat a Section 163(j) Interest Dividend as interest income, you must have held your shares in a Fund for more than 180 days during the 361-day period beginning on the date that is 180 days before the date on which the share becomes ex-dividend with respect to such dividend. Section 163(j) Interest Dividends, if so designated by a Fund, will be reported to your financial intermediary or otherwise in accordance with the requirements specified by the Internal Revenue Service ("IRS").

You should note that if you purchase shares just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as "buying a dividend" and generally should be avoided by taxable investors.

Each sale of Fund shares may be a taxable event. For tax purposes, an exchange of your Fund shares for shares of a different fund is the same as a sale. Assuming a shareholder holds Fund shares as a capital asset, the gain or loss on the sale of Fund shares generally will be treated as a short-term capital gain or loss if you held the shares for 12 months or less or as long-term capital gain or loss if you held the shares for longer. Any loss realized upon a taxable disposition of Fund shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by you with respect to Fund shares. All or a portion of any loss realized upon a taxable

disposition of Fund shares will be disallowed if you purchase other substantially identical shares within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% tax on their “net investment income,” including interest, dividends, and capital gains (including capital gains realized on the sale or exchange of shares of a Fund).

The Funds (or their administrative agent) must report to the IRS and furnish to Fund shareholders cost basis information for Fund shares. In addition to reporting the gross proceeds from the sale of Fund shares, the Funds (or their administrative agent) are also required to report the cost basis information for such shares and indicate whether these shares had a short-term or long-term holding period. For each sale of Fund shares, the Funds will permit shareholders to elect from among several IRS-accepted cost basis methods, including the average cost basis method. In the absence of an election, the Funds will use a default cost basis method. The cost basis method elected by the Fund shareholder (or the cost basis method applied by default) for each sale of Fund shares may not be changed after the settlement date of each such sale of Fund shares. Fund shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

To the extent a Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. If more than 50% of the total assets of a Fund consists of foreign securities, such Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. A Fund (or its administrative agent) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Because each shareholder's tax situation is different, you should consult your tax advisor about the tax implications of an investment in the Funds.

More information about taxes is in the SAI.

Additional Information

The Trust enters into contractual arrangements with various parties, including, among others, the Funds' investment adviser, custodian, transfer agent, accountants, administrator and distributor, who provide services to the Funds. Shareholders are not parties to, or intended (or "third-party") beneficiaries of, any of those contractual arrangements, and those contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce the terms of the contractual arrangements against the service providers or to seek any remedy under the contractual arrangements against the service providers, either directly or on behalf of the Trust.

This prospectus and the SAI provide information concerning the Trust and the Funds that you should consider in determining whether to purchase shares of the Funds. The Funds may make changes to this information from time to time. Neither this prospectus, the SAI or any document filed as an exhibit to the Trust's registration statement, is intended to, nor does it, give rise to an agreement or contract between the Trust or the Funds and any shareholder, or give rise to any contract or other rights in any individual shareholder, group of shareholders or other person other than any rights conferred explicitly by federal or state securities laws that may not be waived.

Financial Highlights

The tables that follow present performance information about Institutional Shares and Investor Shares of the Funds. This information is intended to help you understand the Funds' financial performance for the period of the Funds' operations. Certain information reflects financial results for a single Fund share. The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of dividends and distributions). The information provided below has been audited by PricewaterhouseCoopers LLP, independent registered public accounting firm of the Funds. The financial statements and the unqualified opinion of PricewaterhouseCoopers LLP are included in the Funds' Form N-CSR filing for the fiscal year ending September 30, 2024, and are available upon request by calling the Funds at 800-252-4993.

Ratio of Expenses to Average Net Assets (Excluding Waivers, Reimbursements and Fees Paid Indirectly)	2.15%	2.34%	3.21%	3.06%	3.57%
Ratio of Net Investment Income (Loss) to Average Net Assets	0.13%	0.52%	(0.21)%	0.08%	1.50%
Portfolio Turnover Rate	92%	102%	109%	108%	136%

^A Amount represents less than \$0.005 per share.

^{AA} See Note 2 in the Notes to Financial Statements.

[†] Return is for the period indicated and has not been annualized. Total return would have been lower had certain expenses not been waived and assumed by the Adviser during the period. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

[‡] The ratio rounds to 0.00% due to the relative net asset value of Investor Shares. Prospectively, it is expected the ratio of net expenses to average net assets would approximate 1.23% (4.10% excluding waivers, reimbursements and fees paid indirectly), for the year ended September 30, 2020.

⁽¹⁾ Per share calculations were performed using average shares for the period.

Amounts designated as “—” are \$0 or have been rounded to \$0.

Privacy Notice

This information is not part of the prospectus.

The Funds recognize and respect the privacy concerns of their customers. The Funds collect nonpublic personal information about you in the course of doing business with shareholders and investors. "Nonpublic personal information" is personally identifiable financial information about you. For example, it includes information regarding your social security number, account balance, bank account information and purchase and redemption history.

THE FUNDS COLLECT THIS INFORMATION FROM THE FOLLOWING SOURCES:

- Information we receive from you on applications or other forms;
- Information about your transactions with us and our service providers, or others;
- Information we receive from consumer reporting agencies (including credit bureaus).

WHAT INFORMATION THE FUNDS DISCLOSE AND TO WHOM THE FUNDS DISCLOSE INFORMATION.

The Funds only disclose nonpublic personal information the Funds collect about shareholders as permitted by law. For example, the Funds may disclose nonpublic personal information about shareholders:

- To government entities, in response to subpoenas or to comply with laws or regulations.
- When you, the customer, direct the Funds to do so or consent to the disclosure.
- To companies that perform necessary services for the Funds, such as shareholder servicing centers that the Funds use to process your transactions or maintain your account.
- To protect against fraud, or to collect unpaid debts.

INFORMATION ABOUT FORMER CUSTOMERS.

If you decide to close your account(s) or become an inactive customer, we will adhere to the privacy policies and practices described in this notice.

HOW THE FUNDS SAFEGUARD INFORMATION.

The Funds conduct their business affairs through trustees, officers and third parties that provide services pursuant to agreements with the Funds (for example, the service providers described above). We restrict access to your personal and account information to those persons who need to know that information in order to provide services to you. The Funds or their service providers maintain physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

CUSTOMERS OF OTHER FINANCIAL INSTITUTIONS.

In the event that you hold shares of the Funds through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary will govern how your non-public personal information will be shared with non-affiliated third parties by that entity.

Philadelphia, Pennsylvania 19103

More information about the Funds is available, without charge, through the following:

Statement of Additional Information ("SAI"): The SAI, dated January 28, 2025, as it may be amended from time to time, includes detailed information about the Funds and The Advisors' Inner Circle Fund III. The SAI is on file with the U.S. Securities and Exchange Commission (the "SEC") and is incorporated by reference into this prospectus. This means that the SAI, for legal purposes, is a part of this prospectus.

Annual and Semi-Annual Reports: Additional information about the Funds' investments is available in the Funds' annual and semi-annual reports to shareholders and in Form N-CSR filed with the SEC. In the Funds' annual report, you will find a discussion of the market conditions and investment strategies that significantly affected each Fund's performance during its last fiscal year. In Form N-CSR, you will find the Funds' annual and semi-annual financial statements.

To Obtain an SAI, Annual or Semi-Annual Reports, Fund Financial Statements, or More Information:

By Telephone: 800-252-4993

By Mail: MetLife Funds
P.O. Box 219009
Kansas City, MO 64121-9009

By Internet: <https://investments.metlife.com/mutual-fund-documents>

From the SEC: You can also obtain the SAI or the Annual and Semi-Annual Reports, as well as other information about The Advisors' Inner Circle Fund III, from the EDGAR Database on the SEC's website at: <http://www.sec.gov>. You may also obtain this information, upon payment of a duplicating fee, by e-mailing the SEC at the following address: publicinfo@sec.gov.

The Trust's Investment Company Act registration number is 811-22920.
