- Collective Investment Trust (CIT)
- Mutual Fund

Benchmark²

Bloomberg U.S. Aggregate Bond Index

Typical Targets³

Alpha (bps)	125 - 175
Tracking Error (bps)	100 - 200
Government (%)	5 - 40
Credit (%)	15 - 50
Agency MBS (%)	15 - 50
CMBS (%)	0 - 10
ABS (%)	0 - 10
Plus/Non-Index Sectors (%)	0 - 20

OUR STRENGTHS

We believe our key competitive strengths are:

- **Investment Style** — Portfolio Managers, Research Analysts and Traders work together; focused primarily on security selection within a duration neutral portfolio.
- **Size** — Our size helps ensure sufficient diversification at the portfolio level, while being able to source new issue allocations, participate in smaller deals, and remain sufficiently nimble to reposition the portfolio as market opportunities arise.
- **Experience** — Our deep credit experience helps enable us to navigate various market cycles, looking for any market dislocations and exercising an appropriate sell discipline.

PHILOSOPHY AND PROCESS

We believe fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, downgrade and liquidity risks.

We seek to exploit inefficiencies in the market and provide clients with excess returns to the benchmark without incurring undue risk through:

- Conducting proprietary, in-depth fundamental research
- Targeting duration-neutral portfolios
- Constructing portfolios with attractive risk / reward characteristics

ALPHA DRIVERS

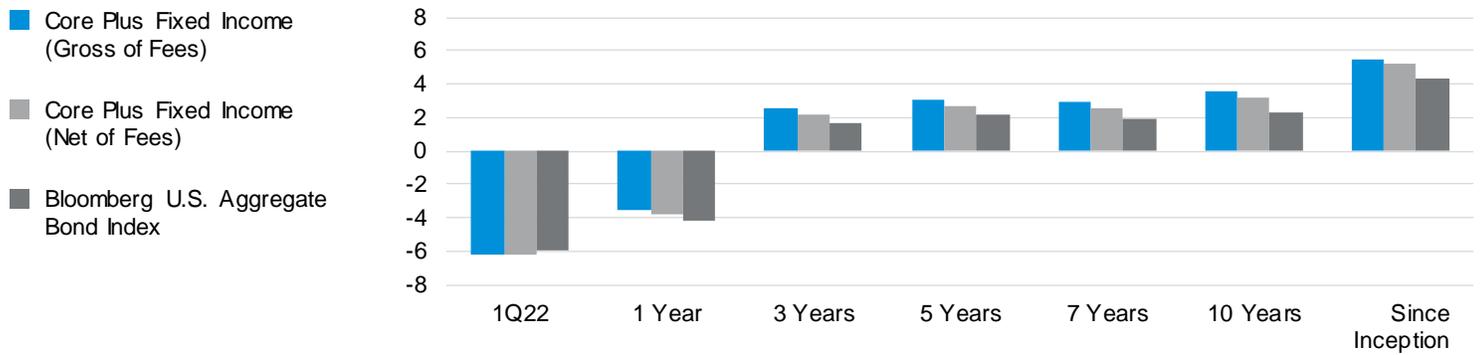

- Methodical portfolio construction seeks to exploit inefficiencies across the curve
- Emphasis on specific characteristics of an issuer, industry consolidation, downgrades and upgrades, improving fundamentals, and identifiable potential catalysts
- Little emphasis on macro bets, such as duration and term structure
- Willingness to invest in off-the-run bonds and allow our credit research team to take a deeper dive to identify value
- Belief in the ability to turn the portfolio over to source new ideas at attractive levels and aim to exit positions with rich valuations

1. Stated at estimated fair value (unaudited). Core Plus Income is a strategy of public fixed income assets. Total Strategy Assets for Core Plus Fixed Income include all assets managed by MIM in the Core Plus Fixed Income strategy and may include certain assets that are not included in Composite Assets (as presented in GIPS® Composite Statistics and Performance table on the following page) for Core Plus Fixed Income.

2. Please see the full GIPS® disclosures at the end of this document.

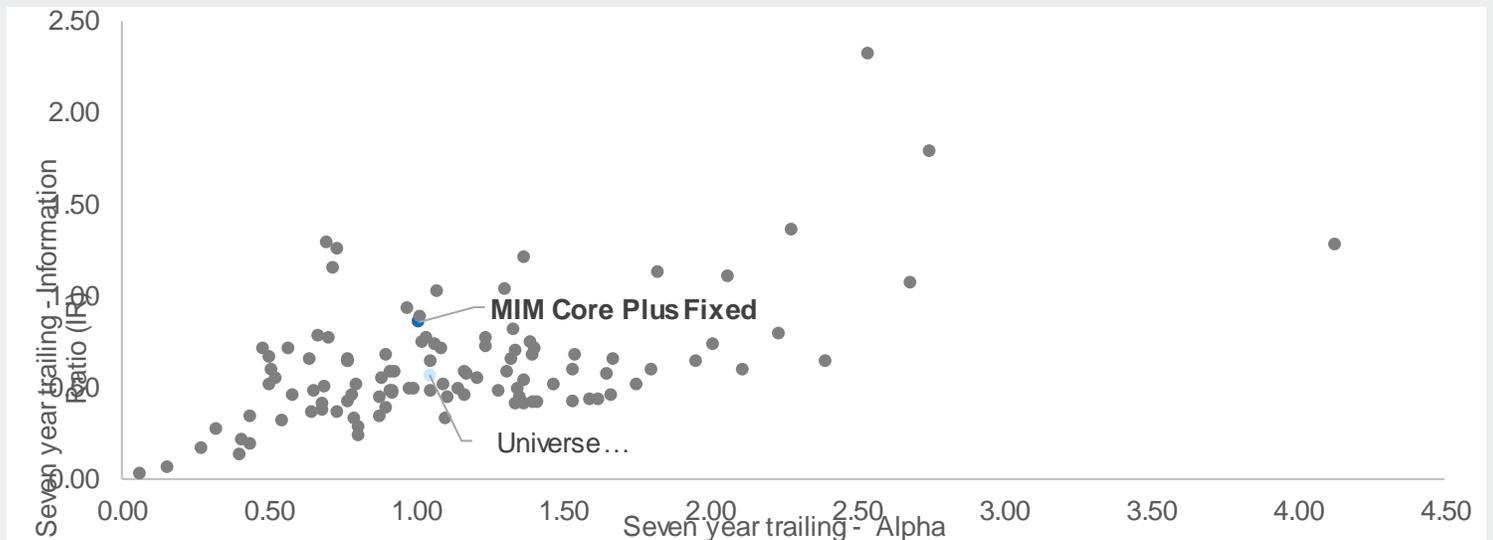

3. Any portfolio targets and/or limits are used to illustrate the Investment Manager's current intentions and may be subject to change without notice. Target Alpha is an investment objective and not a promise of future results or performance. This target is considered gross of fees and over a 3 to 5 year time horizon under normal market conditions. There can be no assurance that a portfolio will achieve its target alpha.

COMPOSITE PERFORMANCE (%)¹

	1Q22	1 Year	3 Years	5 Years	7 Years	10 Years	Since Inception
Core Plus (Gross of fees)	-6.14	-3.5	2.58	3.07	2.88	3.6	5.53
Core Plus (Net of fees)	-6.22	-3.84	2.23	2.71	2.52	3.24	5.17
Bloomberg U.S. Aggregate Bond Index	-5.93	-4.15	1.69	2.14	1.87	2.24	4.32
Tracking Error		0.51	1.46	1.21	1.17	1.1	2.77
Information Ratio		1.29	0.61	0.77	0.86	1.24	0.44

7 YEAR TRAILING ALPHA & INFORMATION RATIO²

1. Past performance is not indicative of future results. Net of fee returns reflect the deduction of investment advisory fees and are calculated in the same manner as gross of fee returns. Net of fee returns are calculated using the highest fee rate disclosed in the Form ADV. Fees for separate accounts may be negotiable depending upon asset size and type of account. For additional benchmark disclosure, please see the GIPS® disclosures at the end of this presentation. Tracking error is calculated by subtracting the return of a specified benchmark from the manager's return for each period and then calculating the standard deviation of those differences. Information ratio is the return of the portfolio minus the return of the benchmark divided by tracking error.

2. The eVestment Universe ranking is calculated by eVestment using investment performance returns gross of fees and strategy descriptions self-reported by participating investment managers and are not verified or guaranteed by eVestment. eVestment defines each Universe and selects the participating managers for the Universe it determines have similar investment strategies. The Universe ranking uses gross performance as manager fees may vary so that returns will be reduced when advisory fees are deducted. Performance returns for periods greater than one year are annualized. Additional information regarding net performance rankings is available upon request. The reports of the Universe percentile ranks were sourced on April 26, 2022, and represent 93% of the reported eVestment Core Plus Fixed Income Universe as of that date. MIM has not verified and cannot verify the information from outside sources. eVestment calculates Alpha by subtracting the return of a specified benchmark from the manager's return and Information Ratio by subtracting the return of the benchmark from the return of the portfolio divided by tracking error.

QUARTERLY PERFORMANCE ATTRIBUTION

- Relative underperformance came from security selection and sector allocation while curve positioning contributed.
- Within Financials, security selection in Banking was the largest drag. Longer dated holdings in Brokerage/Asset Managers detracted from relative performance. Security selection in Retail and Office REITs modestly detracted. Life Insurance performed poorly during the quarter but was offset by positive security selection decisions within P&C Insurance.
- Although the Energy sector performed well on the back of rising oil prices, security selection was a significant detractor as exposure to Russia in Integrated Energy weighed heavily on returns.
- Security selection in Technology was negative in the quarter as M&A activity weighed on holdings.
- In Consumer Non-Cyclicals, Food & Beverage and Health Care contributed positively, however, Tobacco performed poorly amid regulatory concerns.
- In Communications, participation in issuances was additive in Media & Entertainment. In Wireless, shorter holdings withstood the quarter's spread widening, adding to relative returns. In Cable & Satellite, legacy holdings detracted on the back of new issuance in March.
- In Consumer Cyclicals, lack of exposure to Retailers was additive.
- In Utilities, security selection within Electric was additive.
- In Agency RMBS, an overweight to specified pools and an underweight to GNMA's detracted from relative returns. Non-Agency MBS added to performance as our holdings outperformed the benchmark. An overweight to higher quality CMBS was additive, however, CRE CLO holdings slightly detracted from relative performance. In ABS, security selection in floating rate student loans and fixed rate auto ABS were notable outperformers. CLO excess returns slightly outperformed the excess returns of the overall benchmark, so an overweight to CLOs was additive to overall performance.
- An underweight to Sovereigns/Quasis detracted as non-corporate credit outperformed.
- In High Yield Industrials, allocation to Communications, Consumer Non-Cyclicals and Consumer Cyclicals detracted while exposure to HY Energy was additive. In HY Financials, exposure to Finance Companies dragged on relative returns as well as exposure to Banking.

STRATEGY

With respect to fundamentals, we are focused on the upcoming earnings releases for the first quarter period, especially as it relates to margins. Given the rapid and broad-based increase in input costs, we will be diligently monitoring which issuers are able to maintain profitability and those that are unable to exercise pricing power. As of yearend, fundamentals were supportive of tighter valuations with leverage back to pre-pandemic levels and strong coverage. With interest costs rising and elevated margin pressure, this quarter could signal a turn in what has been, for several quarters, a gradually improving fundamental backdrop.

Given the recent interest rate volatility, we have moved to a more constructive, but cautious stance in Structure Products. As we start the new quarter, we maintain our underweight to lower coupons but have been selectively adding exposure on weakness. In the non-agency market, we prefer bonds that have step-up coupons in the event an issuer elects not to call the deal at a predetermined date in the future, based on the pools outstanding balance. CMBS fundamentals continue to cure from the initial outset of the pandemic and now post an overall delinquency rate of below 4%. While the trend has been positive, delinquency levels for lodging and retail segments remain at multiples of their pre-Covid levels. As we head into a slowing economy, these sectors merit watching. In ABS, credit fundamentals remain strong with losses and delinquencies at negligible levels. Low unemployment and strong wage growth are especially supportive of consumer ABS, though we would not be surprised to see some credit deterioration over the coming year as conditions normalize. Other sectors that look attractive with the wider level of spreads include single family rental, private student loans and unsecured consumer. We continue to like CLOs as a core holding as they compare well from both a spread and yield perspective to other similar spread duration assets. However, we will be closely monitoring metrics to see how higher rates affect coverage ratios, and how companies are able to pass through higher costs as a result of the current inflation regime.

The views presented above are MIM's and are subject to change over time. There can be no assurance that the views expressed above will prove accurate and should not be relied upon as a reliable indicator of future events.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

- The performance benchmark for the Core Plus Fixed Income composite is the Bloomberg U.S. Aggregate Bond Index, which is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed rate and hybrid ARM pass-throughs), ABS, and CMBS. The index does not reflect holdings in all sectors targeted within the Core Plus Fixed Income strategy. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.
- The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
- The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36 month period. The standard deviation is not presented for 2000 through 2010 because it is not required for periods prior to 2011. It is also not presented for quarter-ends.
- Prior to July 1, 2019, the investment team was part of a prior firm. Therefore, "Total Firm Assets (BB)" is left blank for year ends before the team joined MetLife Investment Management.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

MetLife Investment Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MetLife Investment Management has been independently verified for periods January 1, 2011 through June 30, 2019. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The **Core Plus Fixed Income** composite has had a performance examination for the periods **November 1, 2007 through June 30, 2019**. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The creation date of the Core Plus Fixed Income ("Core Plus") composite is November 1, 2007 and the inception date is October 1, 2000. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with prior firms. The composite has been examined for the periods November 1, 2007 to June 30, 2019 while at another firm. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019. The verification and performance examination reports are available upon request.

The Core Plus strategy seeks to outperform the broad fixed income market by investing in a core of high quality U.S. fixed income securities across the government, corporate and structured markets, supplemented with U.S. high yield bonds and international bonds in both established and emerging markets. Derivatives may make up a part of the Core Plus strategy, as the Firm may utilize futures, forwards and interest rate swaps to manage risk, rather than for speculative purposes. The Core Plus composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy, except as otherwise excluded herein. The Firm maintains a complete list and description of composites and a list of broad distribution pooled funds, which are available upon request. Policies for valuing portfolios, calculating performance and preparing GIPS reports are available upon request.

Effective August 1, 2020, the Firm removes accounts that have a significant monthly external aggregate cash flow greater than 20%. Between May 1, 2020 and July 31, 2020, there was no significant cash flow policy for this composite. From November 1, 2007 until April 30, 2020, the Core Plus composite had a significant cash flow policy which was applied consistently and within GIPS® standards. The Firm chose to remove accounts that had a significant monthly external aggregate cash flow greater than 10%. Aggregate cash flow is defined as additions plus withdrawals over the monthly period. If the significant cash flow was client directed requiring security liquidation that materially affected account management, the Firm removed the account the month of security liquidations. The account was reinstated to the composite once the portfolio manager determined the flow had not impacted the management of the account and the account was invested as per the strategy. Additional information regarding the treatment of significant cash flows is available upon request.

The performance benchmark for the Core Plus composite is the Bloomberg U.S. Aggregate Bond Index, which is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed rate and hybrid ARM pass-throughs), ABS, and CMBS. The Bloomberg U.S. Aggregate Bond Index does not reflect all sectors targeted within the Core Plus strategy. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are presented gross and net of fees and include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Results calculated gross of fees do not reflect the deduction of our investment management fees. Individual client results will be reduced by investment management fees and other expenses that the account may incur. Results are calculated net of withholding taxes on dividends, interest and capital gains. The investment management fee schedule for the Core Plus strategy 0.35% on the first \$50 million, 0.30% on amounts from \$50 million to \$150 million and 0.25% on amounts over \$150 million. Net returns have been calculated by reducing the monthly gross returns by the twelfth root of a model fee equal to the highest stated ADV fee for the strategy. Net returns have been calculated by reducing the monthly gross returns by the highest stated ADV fee of 0.35%. Investment management fees are described in Part 2A of the Firm's Form ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.

Disclaimers

This material is intended for institutional investor, qualified investor and financial professional use only. Not suitable for use with general retail public.

Your capital is at risk. Investing in the strategies discussed herein are subject to various risks which must be considered prior to investing. These risks may include, but are not limited to **Liquidity Risk**, **Interest Rate Risk**, **Credit Risk**, **Prepayment Risk**, and **Counterparty Risk**. For a more complete list please contact your sales representative.

Risk of loss An investment in the strategy described herein is speculative and there can be no assurance that the strategy's investment objectives will be achieved. Investors must be prepared to bear the risk of a total loss of their investment.
