

STRATEGY INFORMATION

Inception Date

February 1, 2011

Portfolio Managers

Andrew J. Kronschnabel, CFA
Joshua Lofgren, CFA

Investment Approach

- Seeks to produce positive total returns in all market environments by employing multiple credit-based investment strategies while minimizing interest rate duration exposure
- Unconstrained, multi-sector credit strategy targeting investment opportunities across the entire spectrum of credit markets and products.
- Deep fundamental credit research complemented by active trading within a risk management framework that places a premium on liquidity and downside protection
- Rigorous bottom-up investment process that identifies long/short ideas across the credit markets, agnostic to market direction

Key Differentiators

- Dedicated solely to the institutional marketplace
- 10+ year track record demonstrates the ability to successfully navigate various market cycles.
- Deep fundamental credit research capabilities with sector dedicated credit research analysts

PORTFOLIO STATISTICS¹

Beta²

- Past performance is not indicative of future results. Performance figures are shown net of fees. Net of fee returns are calculated using the highest fee rate disclosed in the Form ADV. Fees for separate accounts may be negotiable depending upon asset size and type of account. For additional information about fees and performance, please see the GIPS® disclosures at the end of this Presentation. The 10-Year U.S. Treasury yield is used for discussion purposes only. The Long/Short Credit composite does not utilize a benchmark. Due to the use of alternative trade structures (e.g. pairs trading, shorting), a high degree of turnover and concentration, MIM believes that traditional indices share little to no similarity to the strategy and therefore are not appropriate.
- The characteristics displayed are for a representative account. Actual account characteristics may differ. All data above is provided for illustrative purposes only. The indices presented include the HFRX Fixed Income – Credit Index, HFRX Global Hedge Fund Index, BofA US High Yield Constrained Index; Bloomberg U.S. Corporate Investment Grade Index; Bloomberg U.S. Aggregate Index, the BofA Current 10 Year U.S. Treasury Index. The HFRX Global Hedge Fund Index is designed to be representative of the overall composition of the hedge fund universe. The HFRX Fixed Income – Credit Index includes strategies with exposure to credit across a broad continuum of credit sub-strategies, including corporate, sovereign, distressed, convertible, asset backed, Capital Structure Arbitrage, Multi-Strategy and other Relative Value and Event Drive sub-strategies. The Aggregate Bond Index, which is a broad based index, measures the investment grade, U.S. dollar denominated, fixed rate, taxable bond market. The Bank of America US High Yield Constrained Index is an unmanaged portfolio constructed to mirror the high yield debt market. The Bloomberg US Corporate Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate, taxable corporate bond market. These indices are presented here to demonstrate correlation and beta information and are used for discussion purposes only. The Long / Short Credit strategy does not utilize a benchmark. This information is supplemental to the information required in a GIPS® compliant presentation.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

1. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
2. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36 month period. The standard deviation is not presented for 2011 through 2013 because the composite had not been in existence for three years. It is also not presented for quarter-ends.
3. Prior to July 1, 2019, the investment team was part of a prior firm. Therefore, "Total Firm Assets (BB)" is left blank for year ends before the team joined MetLife Investment Management.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

MetLife Investment Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MetLife Investment Management has been independently verified for periods **January 1, 2011 through June 30, 2019**. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The **Long/Short Credit** composite has had a performance examination for the periods **February 1, 2011 through June 30, 2019**. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The creation date of the Long/Short Credit composite is November 1, 2015 and the inception date is February 1, 2011. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with prior firms. The composite has been examined for the periods February 1, 2011 to June 30, 2019 while at another firm. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019. The verification and performance examination reports are available upon request.

The Long/Short Credit strategy seeks positive returns regardless of market environment through a credit based, multi-strategy best ideas approach, implemented without a benchmark orientation while seeking to minimize interest rate duration exposure. The strategy will invest in investment grade and below investment grade securities. Derivatives make up a part of the Long/Short Credit strategy and the Firm may utilize a variety of futures, forwards and swaps for speculative and hedging purposes. The Long/Short Credit strategy may also utilize leverage. The Long/Short Credit composite does not utilize a benchmark. Effective March 1, 2021 the Long/Short Credit composite contains fully discretionary, fee-paying fixed income accounts with assets exceeding \$25 million, managed in accordance with the applicable composite strategy except as otherwise excluded herein. Prior to March 1, 2021 there was no minimum account size for the Long Credit Fixed Income composite. Due to the use of alternative trade structures (e.g. pairs trading, shorting), a high degree of turnover and concentration, the Firm believes that traditional indices share little to no similarity to the strategy and therefore are not appropriate. The Long/Short Credit composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy except as otherwise excluded herein. The Firm maintains a list of composites and descriptions, a list of limited distribution pooled funds and their descriptions, and a list of broad distribution pooled funds, all of which are available upon request. Policies for valuing investments, calculating performance and preparing GIPS reports are available upon request.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted gross of fee portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are presented gross and net of fees, include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Net returns have been calculated by reducing the monthly gross returns by the twelfth root of a model fee equal to the highest stated ADV fee for the strategy. The highest stated investment management fee for the Long/Short Credit strategy is 1.25%. From inception to August 31, 2014 the highest stated fee was 1.00%. Net of fee returns have been calculated by reducing the monthly gross returns by the highest stated fee of 1.00% from inception to August 31, 2014 and 1.25% from August 31, 2014 to present. Investment management fees are described in greater detail in the Firm's ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.

Disclaimers

This material is intended for institutional investor, qualified investor and financial professional use only. Not suitable for use with general retail public.

Your capital is at risk. Investing in the strategies discussed herein are subject to various risks which must be considered prior to investing. These risks may include, but are not limited to **Liquidity Risk**, **Interest Rate Risk**, **Credit Risk**, **Prepayment Risk**, and **Counterparty Risk**. For a more complete list please contact your sales representative.

Risk of loss An investment in the strategy described herein is speculative and there can be no assurance that the strategy's investment objectives will be achieved. Investors must be prepared to bear the risk of a total loss of their investment.

This document has been prepared by MetLife Investment Management, LLC (formerly, MetLife Investment Advisors, LLC), a U.S. Securities Exchange Commission-registered investment adviser. MetLife Investment Management, LLC is a subsidiary of MetLife, Inc. and part of MIM.¹ Registration with the SEC does not imply a certain level of skill or that the SEC has endorsed the investment advisor.

MetLife, Inc. provides investment management services to affiliates and unaffiliated third party clients through various subsidiaries.¹ MetLife Investment Management ("MIM"), MetLife, Inc.'s institutional investment management business, is responsible for investments in a range of asset sectors, public and privately sourced, including corporate and infrastructure private placement debt, real estate equity, commercial mortgage loans, customized index strategies, structured finance, emerging market debt, and high yield debt. The information contained herein is intended to provide you with an understanding of the depth and breadth of MIM's investment management services and investment management experience. This document has been provided to you solely for informational purposes and does not constitute a recommendation regarding any investments or the provision of any investment advice, or constitute or form part of any advertisement of, offer for sale or subscription of, solicitation or invitation of any offer or recommendation to purchase or subscribe for any securities or investment advisory services. This Presentation is being provided in summary fashion and does not purport to be complete. The information in the Presentation is as of the date indicated on the cover of this document unless otherwise specified and MIM does not intend to update the information after its distribution, even in the event that the information becomes materially inaccurate. Certain information contained in this Presentation, includes performance and characteristics of MIM's by independent third parties, or have been prepared internally and have not been audited or verified. Use of different methods for preparing, calculating or presenting information may lead to different results for the information presented, compared to publicly quoted information, and such differences may be material.

No tax, legal or accounting advice. This Presentation is not intended to provide, and should not be relied upon for, accounting, legal or tax advice or investment recommendations. Any statements of U.S. federal tax consequences contained in this Presentation were not intended to be used and cannot be used to avoid penalties under the U.S. Internal Revenue Code or to promote, market or recommend to another party any tax-related matters addressed herein.

Forward-Looking Statements:

This document may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words and terms such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will," and other words and terms of similar meaning, or are tied to future periods in connection with a discussion of future performance. Forward-looking statements are based MIM's assumptions and current expectations, which may be inaccurate, and on the current economic environment which may change. These statements are not guarantees of future performance. They involve a number of risks and uncertainties that are difficult to predict. Results could differ materially from those expressed or implied in the forward-looking statements. Risks, uncertainties and other factors that might cause such differences include, but are not limited to: (1) difficult conditions in the global capital markets; (2) changes in general economic conditions, including changes in interest rates or fiscal policies; (3) changes in the investment environment; (4) changed conditions in the securities or real estate markets; and (5) regulatory, tax and political changes. MIM does not undertake any obligation to publicly correct or update any forward-looking statement if it later becomes aware that such statement is not likely to be achieved.
