September 30, 2022

## Inception Date

October 1, 2006

## Total Strategy Assets<sup>1</sup>

\$317.2 million

## Lead Portfolio Manager

Todd Howard, CFA

## Strategy Vehicles

- Separately Managed Account

## Benchmark<sup>2</sup>

Bloomberg U.S. Aggregate Bond Index

## Typical Targets<sup>3</sup>

<b>Core (Government, Investment Grade &amp; Structured Products)</b>	50 - 75
<b>Emerging Markets (Corporate, Local &amp; Hard Currency Sovereign Debt)</b>	75 - 100
<b>High Yield</b>	10 - 70
<b>International Fixed Income</b>	10 - 40

## OUR STRENGTHS

We seek to construct well diversified portfolios that efficiently allocate capital to maximize risk adjusted returns.

We believe our key competitive strengths are:

**Investment Style** — Portfolio Managers, research analysts and traders work together; focused primarily on security selection within a duration neutral portfolio.

**Size** — Our size helps ensure sufficient diversification at the portfolio level, while being able to source new issue allocations, participate in smaller deals, and remain sufficiently nimble to reposition the portfolio as market opportunities arise.

**Experience** — Our deep credit experience help enable us to navigate various market cycles, looking for any market dislocations and exercising an appropriate ell discipline.

## PHILOSOPHY AND PROCESS

We believe fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, downgrade and liquidity risks.

We seek to exploit inefficiencies in the market and provide clients with excess returns to the benchmark without incurring undue risk through:

- Conducting proprietary, in-depth fundamental research
- Targeting duration-neutral portfolios
- Constructing portfolios with attractive risk / reward characteristics

## ALPHA DRIVERS

- Focus on global relative value across the credit spectrum
- Generating returns from country, credit, and currency exposure
- Emphasize specific characteristics of an issuer, industry consolidation, downgrades and upgrades, improving fundamentals, and identifiable potential catalysts
- Portfolios are designed to be a diversified allocation of the broad market, and seek to provide excess return to the benchmark through sector level alpha generation
- Portfolios are disaggregated to allow sector-specific oversight by each portfolio management team

1. Stated at estimated fair value (unaudited). Multi-Sector Fixed Income is a strategy of public fixed income assets. Total Strategy Assets for Multi-Sector Fixed Income include all assets managed by MIM in the Multi-Sector Fixed Income strategy and may include certain assets that are not included in Composite Assets (as presented in GIPS® Composite Statistics and Performance table on the following page) for Multi-Sector Fixed Income.

2. Please see the full GIPS® disclosures at the end of this document.

3. Any portfolio targets and/or limits are used to illustrate the Investment Manager's current intentions and may be subject to change without notice.

## RELATIVE PERFORMANCE (GROSS OF FEES)<sup>2</sup>

- Past performance is not indicative of future results. Net of fee returns reflect the deduction of investment advisory fees and are calculated in the same manner as gross of fee returns. Net of fee returns are calculated using the highest fee rate disclosed in the Form ADV. Fees for separate accounts may be negotiable depending upon asset size and type of account. For additional benchmark disclosure, please see the GIPS® disclosures at the end of this presentation. Tracking error is calculated by subtracting the return of a specified benchmark from the manager's return for each period and then calculating the standard deviation of those differences. Information ratio is the return of the portfolio minus the return of the benchmark divided by tracking error.
- The eVestment Universe ranking is calculated by eVestment using investment performance returns gross of fees and strategy descriptions self-reported by participating investment managers and are not verified or guaranteed by eVestment. eVestment defines each Universe and selects the participating managers for the Universe it determines have similar investment strategies. The Universe ranking uses gross performance as manager fees may vary so that returns will be reduced when advisory fees are deducted. Performance returns for periods greater than one year are annualized. Additional information regarding net performance rankings is available upon request. The reports of the Universe percentile ranks were sourced on October 25, 2022 and represent 87% of the reported eVestment Global Unconstrained Fixed Income Universe as of that date. MIM has not verified and cannot verify the information from outside sources.

## STRATEGY

Looking ahead, one area of the market we feel comfortable adding to right now is short-dated credit. Flatter rate and spread curves have created extremely attractive opportunities to allocate capital in a maturity window in which we believe we can get very comfortable with the trajectory of the balance sheet. We believe we can structure portfolios to continue to add some yield advantage to the portfolio (at the expense of cash and Treasuries) while still maintaining a generally conservative risk posture until valuations cheapen further.

Investing in EM in the current environment remains challenging, aggravated by limited liquidity and a hawkish Fed. Macro factors led by the Russia/Ukraine War, global inflation, and China growth are driving recent risk-off appetite, steering asset valuations, and overshadowing EM fundamentals.

These macro headwinds are significant for assets; however, the buffers across many EM corporates and sovereigns are substantial and underrealized. Corporates have priced in downside risk but remain hostage to elevated sovereign spread levels that are weighed down by global factors. As we begin to see clarity on the macro side, we expect stability in spreads and a repricing to better reflect fundamentals, supporting the overall EM asset class and risk appetite.

Within High Yield, fundamental credit research and security selection will be key to navigating in this challenging environment. Due to high uncertainty, our bias is to remain in higher quality issuers with strong balance sheets that can manage through a downturn. Managing downside risk by avoiding issuers who fall short of expectations will also be important to success.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

1. The performance benchmark for the Multi-Sector Fixed Income composite is the Bloomberg U.S. Aggregate Bond Index which is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed rate and hybrid ARM pass-throughs), ABS, and CMBS. The Aggregate U.S. Bond Index does not reflect all sectors targeted within the Multi-Sector strategy. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.
2. The dispersion of annual returns is measured by the standard deviation among asset-weighted gross of fee portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
3. The three-year annualized standard deviation measures the variability of the gross of fee composite and the benchmark returns over the preceding 36 month period. The standard deviation is not presented for 2006 through 2010 because it is not required for periods prior to 2011. It is also not presented for quarter-ends.
4. Prior to July 1, 2019, the investment team was part of a prior firm. Therefore, "Total Firm Assets (BB)" is left blank for year ends before the team joined MetLife Investment Management.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

MetLife Investment Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MetLife Investment Management has been independently verified for periods **January 1, 2011 through December 31, 2020**. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The **Multi-Sector Fixed Income** composite has had a performance examination for the periods **November 1, 2007 through December 31, 2020**. The verification and performance examination reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The creation date of the Multi-Sector Fixed Income ("Multi-Sector") composite is November 1, 2007 and the inception date is October 1, 2006. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with prior firms. The composite has been examined for the periods November 1, 2007 to June 30, 2019 while at another firm. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019. The verification and performance examination reports are available upon request.

The Multi-Sector strategy seeks to outperform the broad fixed income market by investing in U.S. investment grade bonds, U.S. high yield bonds, U.S. structured markets, emerging market debt sovereign and corporate securities and international currency and bonds in both established and emerging markets. Derivatives may make up a part of the Multi-Sector strategy, as the Firm utilizes futures, forwards and interest rate swaps to manage risk, rather than for speculative purposes. The composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy except as otherwise excluded herein. The Firm maintains a list of composites and descriptions, a list of limited distribution pooled funds and their descriptions, and a list of broad distribution pooled funds, all of which are available upon request. Policies for valuing investments, calculating performance and preparing GIPS reports are available upon request.

The performance benchmark for the Multi-Sector composite is the Bloomberg U.S. Aggregate Bond Index which is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed rate and hybrid ARM pass-throughs), ABS, and CMBS. The Aggregate U.S. Bond Index does not reflect all sectors targeted within the Multi-Sector strategy. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted gross of fee portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are presented gross and net of fees, include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Net of fee returns reflect the deduction of investment management fees and are calculated in the same manner as gross of fee returns. The investment management fee schedule for Multi-Sector strategy is 0.40% on the first \$25 million, 0.35% on amounts from \$25 million to \$100 million and 0.30% on amounts over \$100 million. Net returns have been calculated by reducing the twelfth root of the monthly gross returns by the highest stated ADV fee of the strategy. From inception date to November 2008, the highest stated ADV fee used to calculate monthly net returns was 0.40%. From December 2008 to March 2011 the highest stated ADV fee was 0.65%. From April 2011 to the present the highest stated ADV fee is 0.40%. Investment management fees are described in greater detail in the Firm's Form ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.
