S&P/LSTA U.S. Leveraged Loan BB Index

Typical Targets³

Alpha (bps)	75 – 125
Tracking Error (bps)	100
Syndicated Bank Loans B or above (%)	0 – 100
Syndicated Bank Loans CCC or Below (%)	0 – 10
High Yield Bonds (%)	0 – 10
Cash (%)	0 - 10

OUR STRENGTHS

Our fundamental credit research process seeks to generate attractive returns from the leveraged loan market.

We believe our key competitive advantages are:

Investment Style — Portfolio Managers, research analysts and traders work together; focused primarily on security selection

Size — Our size helps ensure sufficient diversification at the portfolio level, while being able to source new issue allocations, participate in smaller deals, and remain sufficiently nimble to reposition the portfolio as market opportunities arise.

Experience — Our deep credit experience helps enable us to navigate various market cycles, looking for any market dislocations and exercising an appropriate sell discipline.

PHILOSOPHY AND PROCESS

We believe fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, downgrade and liquidity risks.

We seek to exploit inefficiencies in the market and provide clients with excess returns to the benchmark without incurring undue risk through:

- Conducting proprietary, in-depth fundamental research
- Targeting duration-neutral portfolios
- Constructing portfolios with attractive risk / reward characteristics

ALPHA DRIVERS

- Portfolios are constructed from the bottom up, with a focus on relative value regardless of sector
- Emphasize specific characteristics of an issuer, industry consolidation, downgrades and upgrades, improving fundamentals, and identifiable potential catalysts
- We do not put a large emphasis on macro bets
- Willing to invest in off-the-run bonds and loans and allow our credit research team to take a deeper dive to identify value
- Believe in the ability to turn the portfolio over to source new ideas at attractive levels and aim to exit positions with rich valuations

1. Stated at estimated fair value (unaudited). High Quality Bank Loans is a strategy of public fixed income assets. Total Strategy Assets for High Quality Bank Loans include all assets managed by MIM in the High Quality Bank Loan strategy and may include certain assets that are not included in Composite Assets (as presented in GIPS® Composite Statistics and Performance table on the following page) for High Quality Bank Loans.

2. Please see the full GIPS® disclosures at the end of this document.

3. Any portfolio targets and/or limits are used to illustrate the Investment Manager's current intentions and may be subject to change without notice. Target Alpha is an investment objective and not a promise of future results or performance. This target is considered gross of fees and over a 3 to 5 year time horizon under normal market conditions. There can be no assurance that a portfolio will achieve its target alpha.

COMPOSITE PERFORMANCE (%)¹

	3Q21	YTD	1 Year	3 Years	Since Inception
High Quality Bank Loans (Gross of fees)	1.23	4.04	7.67	4.30	4.35
High Quality Bank Loans (Net of fees)	1.10	3.65	7.13	3.82	3.89
S&P / LSTA U.S. Leveraged Loan BB Index	0.83	2.43	5.24	2.87	2.99

1. Past performance is not indicative of future results. Net of fee returns reflect the deduction of investment advisory fees and are calculated in the same manner as gross of fee returns. Net of fee returns are calculated using the highest fee rate disclosed in the Form ADV. Fees for separate accounts may be negotiable depending upon asset size and type of account. For additional benchmark disclosure, please see the GIPS® disclosures at the end of this presentation. Tracking error is calculated by subtracting the return of a specified benchmark from the manager's return for each period and then calculating the standard deviation of those differences. Information ratio is the return of the portfolio minus the return of the benchmark divided by tracking error.

QUARTERLY PERFORMANCE ATTRIBUTION

The high quality bank loan strategy outperformed on the quarter almost exclusively due to detailed security selection from our research team. The utilities sector was one of the biggest contributors to performance on the quarter, as spikes in natural gas and LNG prices caused many of these bonds to rise. Even with some of our utility names reporting challenged second quarter results, these price spikes still resulted in overall outperformance. A certain industrial equipment name was a large contributor to performance following a significant change at the managerial level, while some of our retail holdings outperformed on the quarter due to strong second quarter earnings. One of our Aero & Defense names was hurt by the departure of the U.S. government and military from Afghanistan in early September. The portfolio's overweight cash position prevented further outperformance.

STRATEGY

We believe the long-term recovery of the leveraged loan market, and broader risk assets, is supported by robust global growth, improving earnings fundamentals, and continued vaccine dissemination. We continue to believe the short-term will be defined by pockets of volatility amid this ongoing recovery trend. The receptiveness to vaccination by the broader population along with ebbs and flows in variant-cases challenge the path to herd immunity and may ultimately lead to COVID-19 becoming more endemic. Furthermore, inflationary pressure and inflections in rates will likely continue to take center stage as the specter of Fed tapering and interest rate hikes becomes more realistic. We are also focused on news of global supply chain disruptions and the impact these can have on input costs and the flow of goods.

Accordingly, we continue to maintain a mildly cautious approach as pandemic-related impacts continue to challenge improvements in underlying company fundamentals. Furthermore, record setting investor demand and issuer-friendly conditions have led to heightened valuations for certain issuers. We will maintain our efforts on identifying credits we feel will provide the best relative value opportunities to drive performance. We believe interest rates will continue to be volatile in the face of persistent inflation threats. Prospects for higher rates will likely continue to put the floating-rate asset class in focus and should support investor demand. We believe the supportive market conditions will continue to lead to a robust primary market, positive momentum in rating migration, and benign default rates. Accordingly, we will selectively participate in the primary market, identifying issuers we feel have solid fundamentals and adding to existing higher conviction holdings. We are beginning to see the LIBOR transition take shape with nearly all new primary LIBOR based deals containing documentation mechanisms to move to an alternative base rate once LIBOR goes away. We have recently seen the launch of several SOFR based loans in the market and expect more to follow.

The views presented above are MIM's and are subject to change over time. There can be no assurance that the views expressed above will prove accurate and should not be relied upon as a reliable indicator of future events.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

1. Performance benchmark for the High Quality Bank Loans Composite is the Standard & Poor's LSTA U.S. Leveraged Loan BB Index. The index is comprised of loans in the S&P/LSTA U.S. Leveraged Loan index which are rated between BB+ and B- by Standard & Poor's Rating Services. To be included in the S&P/LSTA U.S. Leveraged Loan index, Loans must be US dollar denominated, with an initial par amount of at least \$50 Million at issuance. The High Quality Bank Loans Strategy does not invest in all sectors within the benchmark. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.
2. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
3. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36 month period. It is not presented for quarter-ends and periods when 36 monthly composite returns were not available.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

MIM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MIM has been independently verified for the periods January 1, 2011 to June 30, 2019. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The creation date of the Intermediate Duration Constrained composite is June 1, 2020 and the inception date is July 1, 2012. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with prior firms. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019.

The creation date of the High Quality Bank Loans Composite is May 1, 2018 and the inception date is May 1, 2018.

The High Quality Bank Loans Composite is comprised of fee paying portfolios which invest in below-investment grade syndicated bank loans denominated in U.S. Dollars (sometimes referred as "syndicated bank loans" or "leveraged loans") that are issued by a wide range of global corporate borrowers, creating a diversified portfolio of floating rate assets. The investment objective is to offer investors actively managed portfolios of syndicated bank loans that generate attractive total return and current income through business cycles and changing market conditions. The strategy pursues this investment objective by (i) primarily investing in leveraged loans that MIM believes offer an attractive relative value, while maintaining disciplined credit underwriting standards to minimize downside risk, and (ii) focusing on the higher quality segment of the leveraged loan market, which MIM believes offers favorable risk/reward characteristics.

The performance benchmark is the Standard & Poor's LSTA U.S. Leveraged Loan BB Index. The index is comprised of loans in the S&P/LSTA U.S. Leveraged Loan index which are rated between BB+ and B- by Standard & Poor's Rating Services. To be included in the S&P/LSTA U.S. Leveraged Loan index, Loans must be US dollar denominated, with an initial par amount of at least \$50 Million at issuance. The High Quality Bank Loans Strategy does not invest in all sectors within the benchmark. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are presented gross and net of fees, include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded before the deduction of applicable withholding taxes. Returns calculated gross of fees do not reflect the deduction of our investment management fees. Net returns have been calculated by reducing the monthly gross returns by the highest stated ADV fee for the strategy. The investment management fee schedule for the High Quality Bank Loans composite is 0.50% on the first \$50 million, 0.45% on amounts from \$50 million to \$100 million and 0.40% on amounts over \$100 million. From inception date to June 30, 2019, the highest fee used to calculate monthly net returns was 0.35%. From July 1, 2019 to the present the highest stated ADV fee is 0.50%. Investment management fees are described in Part 2A of the Firm's Form ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.

Disclaimers

This material is intended for institutional investor, qualified investor and financial professional use only. Not suitable for use with general retail public.

Your capital is at risk. Investing in the strategies discussed herein are subject to various risks which must be considered prior to investing. These risks may include, but are not limited to **Liquidity Risk**, **Interest Rate Risk**, **Credit Risk**, **Prepayment Risk**, and **Counterparty Risk**. For a more complete list please contact your sales representative.

Risk of loss An investment in the strategy described herein is speculative and there can be no assurance that the strategy's investment objectives will be achieved. Investors must be prepared to bear the risk of a total loss of their investment.

Forward-Looking Statements:

This document may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words and terms such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will," and other words and terms of similar meaning, or are tied to future periods in connection with a discussion of future performance. Forward-looking statements are based MIM's assumptions and current expectations, which may be inaccurate, and on the current economic environment which may change. These statements are not guarantees of future performance. They involve a number of risks and uncertainties that are difficult to predict. Results could differ materially from those expressed or implied in the forward-looking statements. Risks, uncertainties and other factors that might cause such differences include, but are not limited to: (1) difficult conditions in the global capital markets; (2) changes in general economic conditions, including changes in interest rates or fiscal policies; (3) changes in the investment environment; (4) changed conditions in the securities or real estate markets; and (5) regulatory, tax and political changes. MIM does not undertake any obligation to publicly correct or update any forward-looking statement if it later becomes aware that such statement is not likely to be achieved.

1. As of September 30, 2021, subsidiaries of MetLife, Inc. that provide investment management services to MetLife's general account, separate accounts and/or unaffiliated/third party investors include Metropolitan Life Insurance Company, MetLife Investment Management, LLC, MetLife Investment Management Limited, MetLife Investments Limited, MetLife Investments Asia Limited, MetLife Latin America Asesorias e Inversiones Limitada, MetLife Asset Management Corp. (Japan), and MIM I LLC.
