Typical Targets³

| | |
|-----------------------|----------|
| Alpha (bps) | 50 – 75 |
| Tracking Error (bps) | 75 – 100 |
| Government (%) | 10 – 70 |
| Credit (%) | 10 – 40 |
| Agency MBS (%) | 25 – 50 |
| CMBS (%) | 0 – 10 |
| ABS (%) | 0 – 10 |
| Non-Index Sectors (%) | 0 – 20 |

OUR STRENGTHS

We believe our key competitive strengths are:

- **Investment Style** — Portfolio Managers, research analysts and traders work together; focused primarily on security selection within a duration neutral portfolio.
- **Size** — Our size helps ensure sufficient diversification at the portfolio level, while being able to source new issue allocations, participate in smaller deals, and remain sufficiently nimble to reposition the portfolio as market opportunities arise.
- **Experience** — Our deep credit experience helps enable us to navigate various market cycles, looking for any market dislocations and exercising an appropriate sell discipline.

PHILOSOPHY AND PROCESS

We believe fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, downgrade and liquidity risks.

We seek to exploit inefficiencies in the market and provide clients with excess returns to the benchmark without incurring undue risk through:

- Conducting proprietary, in-depth fundamental research
- Targeting duration-neutral portfolios
- Constructing portfolios with attractive risk / reward characteristics

ALPHA DRIVERS

- Methodical portfolio construction to exploit inefficiencies across the curve
- Emphasize specific characteristics of an issuer, industry consolidation, downgrades and upgrades, improving fundamentals, and identifiable potential catalysts
- We do not put a large emphasis on macro bets, such as duration and term structure
- Willing to invest in off-the-run bonds and allow our credit research team to take a deeper dive to identify value
- Believe in the ability to turn the portfolio over to source new ideas at attractive levels and aim to exit positions with rich valuations

1. Stated at estimated fair value (unaudited). Core Fixed Income is a strategy of public fixed income assets. Total Strategy Assets for Core Fixed Income include all assets managed by MIM in the Core Fixed Income strategy and may include certain assets that are not included in Composite Assets (as presented in GIPS® Composite Statistics and Performance table on the following page) for Core Fixed Income.

2. Please see the full GIPS® disclosures at the end of this document.

3. Any portfolio targets and/or limits are used to illustrate the Investment Manager's current intentions and may be subject to change without notice. Target Alpha is an investment objective and not a promise of future results or performance. This target is considered gross of fees and over a 3 to 5 year time horizon under normal market conditions. There can be no assurance that a portfolio will achieve its target alpha.

COMPOSITE PERFORMANCE (%)¹

| | 4Q20 | 1 Year | 3 Years | 5 Years | 7 Years | 10 Years | Since Inception |

| Information Ratio | | 0.43 | 0.54 | 0.84 | 0.94 | 1.10 | 0.24 |

7 YEAR TRAILING ALPHA & INFORMATION RATIO²

Source: eVestment

1. Past performance is not indicative of future results. Returns are self-reported by participating investment managers and are not verified or guaranteed by eVestment. MIM has not verified and cannot verify the information from outside sources. This information is supplemental to the information required in a GIPS® compliant presentation. Additional information regarding net performance rankings is available upon request. See the Performance slide for the actual composite performance and relative peer performance for all periods since inception and the GIPS® disclosures at the end of this Presentation.

2. The eVestment Universe ranking is calculated by eVestment using investment performance returns gross of fees and strategy descriptions self-reported by participating investment managers and are not verified or guaranteed by eVestment. eVestment defines each Universe and selects the participating managers for the Universe it determines have similar investment strategies. The Universe ranking uses gross performance as manager fees may vary so that returns will be reduced when advisory fees are deducted. Performance returns for periods greater than one year are annualized. Additional information regarding net performance rankings is available upon request. The reports of the Universe percentile ranks were sourced on October 21, 2020 and represent 87% of the reported eVestment Core Fixed Income Universe as of that date. MIM has not verified and cannot verify the information from outside sources. eVestment calculates Alpha by subtracting the return of a specified benchmark from the manager's return and Information Ratio by subtracting the return of the benchmark from the return of the portfolio divided by tracking error.

QUARTERLY PERFORMANCE ATTRIBUTION

- Overall, sector allocation, including an underweight in U.S. Treasuries drove outperformance as credit corporate spreads tightened during the quarter. However, overweights to credit sensitive structured product detracted from relative performance.
- In REITS, retail related holdings performed well as brick and mortar retail sales picked up.
- Exposure to a particular name within Finance Companies and Capital Goods added to relative returns.
- Within Communications, sector allocation to Media & Entertainment was additive.
- Within Consumer Non-Cyclicals, Food & Beverage names added to relative performance following their

STRATEGY

In 2021, we expect to see fundamentals trending in a positive direction and technicals to be supportive of credit spreads. Adjusting for credit quality and duration, spreads are well through historical tight. In fact, there have never been 12-month forward positive excess return from these valuations as measured by spread compensation per unit of duration. Never is a long time. We feel investment grade corporates will likely struggle to generate positive total return in the year, and any excess return will be driven by security selection, steep curve roll down and avoiding underperformers. The pandemic accelerated pre-existing trends of remote work, telemedicine, online shopping and digitization. The implications will be wide ranging across sectors, especially REITs, travel related, retail, technology, and energy. We remain cautious on both hospitality and retail based commercial real estate. In non-corporate credit, the EM Sovereign/Quasi space provides an added prospect for yield, given the supportive macro backdrop and weaker US dollar; however, selectivity is key given the pronounced fragilities in certain credits, including increased fiscal deficits. In Municipals, we also remain selective, paying close attention to any strains to fiscal health across the issuer spectrum.

Despite the strong rally down in credit within CMBS, we expect volatility to continue as problem loans play out over a longer time horizon. Much like ABS,

release of better than expected results. In Health Care, names that were able to offset losses from COVID related lockdowns with federal aid performed well.

- In Energy, as oil prices rose by \$8/barrel during the quarter, positions in Independent names and an overweight to Midstream added to relative performance
- In Utilities, a bias toward shorter-dated bonds hurt performance.
- In the non-corporate space, security selection in Sovereign/Quasi sovereigns were additive.
- In Structured Products, sector allocation to MBS, CMBS and ABS were detractors from relative performance.

technicals have led the market while fundamentals continue to weigh on the CMBS sector. We remain constructive on certain parts of the AAA portion of the capital stack but are finding valuations to be challenging. We also see opportunity in Single Asset/Single borrower deals. We believe the Fed will continue to support the mortgage market, but they have accomplished their unstated goal of lowering mortgage rates. Mortgage excess returns versus treasuries were uninspiring in 2020, and as we enter the first quarter, we do not see the prospect of significant out-performance near-term. Current valuation metrics appear tight to us and as a result we favor having a shorter spread duration expressed via an up-in-coupon bias. Given Fed support and bank demand we do not anticipate a dramatic widening in mortgage basis, provided interest rates remain centered around 1% and volatility remaining contained. We continue to favor TBA in the production coupons and specified pools in higher coupons to provide prepayment protection. Within non-agency MBS, our concern about increasing losses as a result of the pandemic has been assuaged given lower unemployment, strong housing fundamentals and the roll-out of the vaccine. Despite delinquencies being elevated in some collateral types, we continue to believe that seasoned AAA securities should benefit from the conservative underwriting standards in place prior to the crisis.

The views presented above are MIM's and are subject to change over time. There can be no assurance that the views expressed above will prove accurate and should not be relied upon as a reliable indicator of future events.

STRATEGY CHARACTERISTICS¹

Past performance is not indicative of future results. Please see GIPS® disclosures on the following page.

1. The performance benchmark for the Core Fixed Income composite is the Bloomberg Barclays U.S. Aggregate Bond Index, which is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed rate and hybrid ARM pass-throughs), ABS, and CMBS. The index does not reflect holdings in all sectors targeted within the Core strategy. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.
2. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
3. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36 month period. The standard deviation is not presented for 2000 through 2010 because it is not required for periods prior to 2011. It is also not presented for quarter-ends.
4. Prior to July 1, 2019, the investment team was part of a prior firm. Therefore, "% Total Firm Assets" is left blank for year ends before the team joined MetLife Investment Management.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

The Firm claims compliance with the Global Investment Performance Standards ("GIPS®") and has prepared and presented this report in compliance with the GIPS® standards. MIM has been independently verified for the periods January 1, 2011 to June 30, 2019. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation.

The creation date of the Core Fixed Income ("Core") composite is November 1, 2007 and the inception date is October 1, 2000. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with prior firms. The composite has been examined for the periods November 1, 2007 to June 30, 2019 while at another firm. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019. The verification and performance examination reports are available upon request.

The Core strategy seeks to produce risk adjusted long-term total returns above the broad bond market by investing in a core of high quality U.S. fixed income securities across the government, corporate and structured markets. Derivatives may make up a part of the Core strategy, as the Firm utilizes futures, forwards and interest rate swaps to manage risk, rather than for speculative purposes. The Core composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy except as otherwise excluded herein. The Firm maintains a complete list and description of composites which are available upon request. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

The Core composite had a significant cash flow policy in effect from November 1, 2007 and was first removed on October 1, 2010. It was reinstated as of May 1, 2011 and then removed on May 1, 2013. The Firm chose to remove accounts that had a significant monthly external aggregate cash flow greater than 10%. Aggregate cash flow was defined as additions plus withdrawals over the monthly period. If the significant cash flow was client directed requiring security liquidation that materially affects account management, the Firm would remove the account the month of security liquidations. The account would be reinstated to the composite once the portfolio manager determined the flow had not impacted the management of the account and the account was invested per the strategy. Additional information regarding the treatment of significant cash flows is available upon request.

The performance benchmark for the Core composite is the Bloomberg Barclays Aggregate Bond Index, which is a broad based index that measures the investment grade, U.S. dollar denominated, fixed rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed rate and hybrid ARM pass-throughs), ABS, and CMBS. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are based on fully discretionary accounts under management and may include terminated accounts. Returns are presented gross and net of fees, include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Net of fee returns reflect the deduction of investment management fees and are calculated in the same manner as gross of fee returns. The investment management fee schedule for the Core strategy is 0.30% on the first \$50 million, 0.25% on amounts from \$50 million to \$150 million and 0.20% on amounts over \$150 million. Net returns have been calculated by reducing the monthly gross returns by the highest stated ADV fee of 0.30%. Investment management fees are described in Part 2A of the Firm's Form ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

General Disclosures

This document is intended for institutional investor, qualified professional investor and financial professional use only. Not suitable for use with general retail public.

This document has been prepared by MetLife Investment Management, LLC (formerly, MetLife Investment Advisors, LLC), a U.S. Securities Exchange Commission-registered investment adviser. MetLife Investment Management, LLC is a subsidiary of MetLife, Inc. and part of MIM.¹ Registration with the SEC does not imply a certain level of skill or that the SEC has endorsed the investment adviser.

Australia

If you are accessing this document from Australia, you represent and warrant that you are a "wholesale client" as defined in section 761G of the Corporations Act 2001 (Cth) (the Act). MetLife Investment Management, LLC ("MIM, LLC") is exempt from the requirement to hold an Australian financial services license under the Act in respect of the financial services it provides to Australian clients. MIM, LLC is regulated by the SEC under United States laws, which differ from Australian laws. The information in this document is not financial product advice and should not be regarded as such and does not take account of your objectives, financial situation or needs. You should seek advice in relation to your personal situation.

If you are a resident of, or are present in, any jurisdiction not listed above, you represent and warrant that you are (or are acting on behalf of) a Professional Investor or equivalent under the applicable regulation of your jurisdiction; you are knowledgeable regarding, and have expertise in making, investments; and you make investments as a regular part of your business. No money, securities or other consideration is being solicited. No invitation is made by this document or the information contained herein to enter into, or offer to enter into, any agreement to purchase, acquire, dispose of, subscribe for or underwrite any securities or structured products, and no offer is made of any shares in or debentures of a company for purchase or subscription. Prospective clients are encouraged to seek advice from their legal, tax and financial advisors prior to making any investment.

Past performance is not indicative of future results. No representation is being made that any investment will or is likely to achieve profits or losses or that significant losses will be avoided. There can be no assurance that investments similar to those described in this document will be available in the future and no representation is made that future investments managed by MIM will have similar returns to those presented herein. All information has been presented in U.S. dollars. Actual returns may increase or decrease due to currency fluctuations.

No reliance, no update and use of information. You may not rely on this document as the basis upon which to make an investment decision. To the extent that you rely on this document in connection with any investment decision, you do so at your own risk. This document is being provided in summary fashion and does not purport to be complete. The information in this document is as of the date indicated on the cover of this document unless otherwise specified and MIM does not intend to update the information after its distribution, even in the event that the information becomes materially inaccurate. Certain information contained in this document includes performance and characteristics of MIM's by independent third parties, or have been prepared internally and have not been audited or verified. Use of different methods for preparing, calculating or presenting information may lead to different results for the information presented, compared to publicly quoted information, and such differences may be material.

Risk of loss. An investment in the strategy described herein is speculative and there can be no assurance that the strategy's investment objectives will be achieved. Investors must be prepared to bear the risk of a total loss of their investment. Your capital is at risk. Investing in the strategies discussed herein are subject to various risks which must be considered prior to investing. These risks may include, but are not limited to Liquidity Risk, Interest Rate Risk, Credit Risk, Prepayment Risk, Currency Risk, Political Risk and Counterparty Risk

No tax, legal or accounting advice. This document is not intended to provide, and should not be relied upon for, accounting, legal or tax advice or investment recommendations. Any statements of U.S. federal tax consequences contained in this document were not intended to be used and cannot be used to avoid penalties under the U.S. Internal Revenue Code or to promote, market or recommend to another party any tax-related matters addressed herein.

Forward-Looking Statements. This document may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words and terms such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will," and other words and terms of similar meaning, or are tied to future periods in connection with a discussion of future performance. Forward-looking statements are based MIM's assumptions and current expectations, which may be inaccurate, and on the current economic environment which may change. These statements are not guarantees of future performance. They involve a number of risks and uncertainties that are difficult to predict. Results could differ materially from those expressed or implied in the forward-looking statements. Risks, uncertainties and other factors that might cause such differences include, but are not limited to: (1) difficult conditions in the global capital markets; (2) changes in general economic conditions, including changes in interest rates or fiscal policies; (3) changes in the investment environment; (4) changed conditions in the securities or real estate markets; and (5) regulatory, tax and political changes. MIM does not undertake any obligation to publicly correct or update any forward-looking statement if it later becomes aware that such statement is not likely to be achieved.
