Alpha (bps)	50 - 100
Tracking Error (bps)	75 - 125
Government (%)	0 - 20
Corporates (%)	75 - 100
Structured Product (%)	0 - 5
Plus/Non-Index Sectors (%)	0 - 20

OUR STRENGTHS

Our Corporate Fixed Income Strategy seeks to deliver strong risk adjusted returns over multiple market cycles with top decile performance.

We believe our key competitive strengths are:

Investment Style — Portfolio Managers, research analysts and traders work together; focused primarily on security selection within a duration neutral portfolio.

Size — Our size helps ensure sufficient diversification at the portfolio level, while being able to source new issue allocations, participate in smaller deals, and remain sufficiently nimble to reposition the portfolio as market opportunities arise.

Experience — Our deep credit experience helps enable us to navigate various market cycles, looking for any market dislocations and exercising an appropriate sell discipline.

PHILOSOPHY AND PROCESS

We believe fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, downgrade and liquidity risks.

We seek to exploit inefficiencies in the market and provide clients with excess returns to the benchmark without incurring undue risk through:

- Conducting proprietary, in-depth fundamental research
- Targeting duration-neutral portfolios
- Constructing portfolios with attractive risk / reward characteristics

ALPHA DRIVERS

- Focus on idiosyncratic security selection to drive alpha
- We do not put a large emphasis on macro bets, such as duration and term structure
- Willing to invest in off-the-run bonds and allow our credit research team to take a deeper dive to identify value
- Emphasize specific characteristics of an issuer, industry consolidation, downgrades and upgrades, improving fundamentals, and identifiable potential catalysts
- Believe in the ability to turn the portfolio over to source new ideas at attractive levels and aim to exit positions with rich valuations

1. Stated at estimated fair value (unaudited). Intermediate Corporate Fixed Income is a strategy of public fixed income assets. Total Strategy Assets for Intermediate Corporate Fixed Income include all assets managed by MIM in the Intermediate Corporate Fixed Income strategy and may include certain assets that are not included in Composite Assets (as presented in GIPS® Composite Statistics and Performance table on the following page) for Intermediate Corporate Fixed Income.

2. Please see the full GIPS® disclosures at the end of this document.

3. Any portfolio targets and/or limits are used to illustrate the Investment Manager's current intentions and may be subject to change without notice. Target Alpha is an investment objective and not a promise of future results or performance. This target is considered gross of fees and over a 3 to 5 year time horizon under normal market conditions. There can be no assurance that a portfolio will achieve its target alpha.

COMPOSITE PERFORMANCE (%)¹

	4Q20	1 Year	3 Years	5 Years	7 Years	Since Inception

Bloomberg Barclays U.S. Intermediate Corporate Index	1.76	7.47	5.70	5.01	4.34	4.32
Tracking Error		0.91	0.64	0.60	0.64	0.66
Information Ratio		0.85	0.77	1.37	1.03	1.12

5 YEAR TRAILING ALPHA & INFORMATION RATIO²

1. Past performance is not indicative of future results. Net of fee returns reflect the deduction of investment advisory fees and are calculated in the same manner as gross of fee returns. Net of fee returns are calculated using the highest fee rate disclosed in the Form ADV. Fees for separate accounts may be negotiable depending upon asset size and type of account. For additional benchmark disclosure, please see the GIPS® disclosures at the end of this presentation. Tracking error is calculated by subtracting the return of a specified benchmark from the manager's return for each period and then calculating the standard deviation of those differences. Information ratio is the return of the portfolio minus the return of the benchmark divided by tracking error.
2. The eVestment Universe ranking is calculated by eVestment using investment performance returns gross of fees and strategy descriptions self-reported by participating investment managers and are not verified or guaranteed by eVestment. eVestment defines each Universe and selects the participating managers for the Universe it determines have similar investment strategies. The Universe ranking uses gross performance as manager fees may vary so that returns will be reduced when advisory fees are deducted. Performance returns for periods greater than one year are annualized. Additional information regarding net performance rankings is available upon request. The reports of the Universe percentile ranks were sourced on October 21, 2020 and represent 87% of the reported eVestment Corporate Fixed Income Universe as of that date. MIM has not verified and cannot verify the information from outside sources. eVestment calculates Alpha by subtracting the return of a specified benchmark from the manager's return and Information Ratio by subtracting the return of the benchmark from the return of the portfolio divided by tracking error.

QUARTERLY PERFORMANCE ATTRIBUTION

- Security selection and sector allocation drove the outperformance in the quarter, while a slight long duration and a position in U.S. Treasuries detracted as corporate spreads tightened.
- Within Financials, an underweight to Banking was additive as the sector underperformed the broader market. Additionally, security selection added to relative returns. In Insurance, positioning in Life Insurers and P&C Insurers also contributed to relative returns, as did REITS as brick and mortar retail sales picked up.
- Security selection in Capital Goods added to relative returns. However, an underweight to Aerospace & Defense detracted amid improved sentiment in the sector
- Within Communications, security selection was additive. However, positioning in short spread duration issues detracted.
- Within Consumer Non-Cyclical, issuers that funded tenders to issue longer dated debt performed well. In Health Care, names that were able to offset losses from early COVID-19 related lockdowns with federal aid added to relative performance.
- In Energy, an overweight to the Midstream sub-sector added to relative returns as oil prices rose by \$8/barrel during the quarter.
- In Utilities, a bias toward shorter-dated bonds hurt performance.
- In High Yield, Energy names added to relative performance on the heels of rising oil prices.

STRATEGY

Within the investment grade corporate market, we evaluate the market via the lenses of fundamentals, technicals and valuations. From a fundamental perspective, pandemic depressed EBITDA combined record issuance has left investment grade corporate balance sheets over-levered for their ratings as debt ratios are more than a full turn higher than pre-pandemic and near historic highs. While certainly a negative on the surface, we believe the current state of balance sheets will serve to limit bondholder unfriendly activity as shareholders and lenders are aligned with respect to balance sheet repair. Also, the 2020 programs of investment grade only corporate purchases by the Federal Reserve has created additional and new motivation to maintain investment grade ratings even in an environment of tight BBB/BB spreads. Against this backdrop and a pick-up in economic activity, we would expect to see fundamentals trending in a positive direction from a bondholder perspective in 2021. Turning toward technicals, here too we find a supportive situation for credit spreads. Aside from being the highest yielding available, recent quarter's liability management exercises have dampened the amount of upcoming maturing debt, lessening the need for refinancing issuance activity. In fact, expected issuance for 2021, while wide ranging, will be significantly less than 2020 concurrent with bondholder friendly, debt reducing liability management that will

continue apace. It's in valuations that we are less compelled. Adjusting for credit quality and duration, spreads are well through historical tightness. In fact, there have never been 12-month forward positive excess return from these valuations as measured by spread compensation per unit of duration. Never is a long time. Investment grade corporates will likely struggle to generate positive total return in the year, and any excess return will likely be driven by security selection, steep curve roll down and avoiding underperformers. The pandemic accelerated pre-existing trends of remote work, telemedicine, online shopping and digitization. The implications will be wide ranging across sectors, especially REITs, travel related, retail, technology, and energy. Additionally, we are closely monitoring the relative value between investment grade issuers and fallen angels in comparable sectors to try and identify attractive opportunities within High Yield. In non-corporate credit, the EM Sovereign/Quasi space provides an added prospect for yield, given the supportive macro backdrop and weaker US dollar; however, selectivity is key given the pronounced fragilities in certain credits, including increased fiscal deficits. In Municipals, we also remain selective, paying close attention to any strains to fiscal health across the issuer spectrum.

The views presented above are MIM's and are subject to change over time. There can be no assurance that the views expressed above will prove accurate and should not be relied upon as a reliable indicator of future events.

Past performance is not indicative of future results. Please see the full GIPS® disclosures on the following page.

- The performance benchmark for the Intermediate Corporate Fixed Income composite is the Bloomberg Barclays U.S. Intermediate Corporate Index, which is a broad based index that measures all publicly issued, fixed rate, non-convertible, investment grade, corporate debt. Issues have specific rating requirements and must be rated investment grade (Baa3/BBB- or higher) by two of Moody's, Fitch or S&P. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.
- The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
- The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36 month period. The standard deviation is not presented for 2000 through 2010 because it is not required for periods prior to 2011. It is also not presented for quarter-ends.
- Prior to July 1, 2019, the investment team was part of a prior firm. Therefore, "% Total Firm Assets" is left blank for year ends before the team joined MetLife Investment Management.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

The Firm claims compliance with the Global Investment Performance Standards ("GIPS®") and has prepared and presented this report in compliance with the GIPS® standards. MIM has been independently verified for the periods January 1, 2011 to June 30, 2019. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation.

The creation date of the Intermediate Fixed Income ("Intermediate") composite is April 13, 2015 and the inception date is July 1, 2013. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with a prior firm. The composite has been examined for the periods July 1, 2013 to June 30, 2019 while at another firm. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019. The verification and performance examination reports are available upon request.

The Intermediate Corporate strategy seeks to outperform the benchmark by investing in high quality fixed income securities across the government, corporate and structured markets, focusing on U.S. investment grade corporate debt. The Intermediate Corporate composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy except as otherwise excluded herein. The Firm maintains a complete list and description of composites which are available upon request. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

The performance benchmark for the Intermediate Corporate composite is the Bloomberg Barclays U.S. Intermediate Corporate Index which is a broad based index that measures all publicly issued, fixed rate, nonconvertible, investment grade, corporate debt. Issues have specific rating requirements and must be rated investment grade (Baa3/BBB- or higher) by two of Moody's, Fitch or S&P. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are presented gross and net of fees and include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Returns calculated gross of fees do not reflect the deduction of our investment management fees. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. The investment management fee schedule for the Intermediate strategy is 0.35% on the first \$50 million, 0.30% on amounts from \$50 to \$150 million and 0.25% on amounts over \$150 million. Net returns have been calculated by reducing the monthly gross returns by the highest stated ADV fee of 0.40%. Investment management fees are described in Part 2A of the Firm's Form ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

General Disclosures

This document is intended for institutional investor, qualified professional investor and financial professional use only. Not suitable for use with general retail public.

This document has been prepared by MetLife Investment Management, LLC (formerly, MetLife Investment Advisors, LLC), a U.S. Securities Exchange Commission-registered investment adviser. MetLife Investment Management, LLC is a subsidiary of MetLife, Inc. and part of MIM.¹ Registration with the SEC does not imply a certain level of skill or that the SEC has endorsed the investment adviser.

This document is issued by MIML only to persons who are qualified as a Professional Client as defined in Directive 2014/65/EU (MiFID II).

Japan

This information is issued by MetLife Asset Management Corp. ("MAM") which is a registered Financial Instruments Business Operator ("FIBO") conducting Investment Advisory Business, Investment Management Business and Type II Financial Instruments Business under the registration entry "Director General of the Kanto Local Finance Bureau (Financial Instruments Business Operator) No. 2414" pursuant to the Financial Instruments and Exchange Act of Japan ("FIEA"), and a regular member of the Japan Investment Advisers Association and the Type II Financial Instruments Firms Association of Japan. In its capacity as a discretionary investment manager registered under the FIEA, MAM provides investment management services and also sub-delegates a part of its investment management authority to other foreign investment management entities within MIM in accordance with the FIEA. This document is only being provided to investors in Japan who are Qualified Institutional Investors (tekikaku kikan toshika) as defined in Article 10 of Cabinet Office Ordinance on Definitions Provided in Article 2 of the FIEA.

Hong Kong S.A.R.

This document is issued by MetLife Investments Asia Limited ("MetLife Asia") for the purposes of providing information on certain securities and securities related services legally permissible to be provided by MetLife Asia in Hong Kong S.A.R. to "professional investors" as defined under the Securities and Futures Ordinance (Cap. 571 of the laws of Hong Kong S.A.R.) [and any subsidiary legislation made thereunder] and is intended for and directed at "professional investors" (as defined above) only. To the extent legally permissible, in providing such securities and securities related services, MetLife Asia may enter into a sub-advisory arrangement with an affiliate whereby such affiliate acts as a sub-advisor to MetLife Asia. MetLife Investments Asia Limited (CE No. ADY079) is licensed by the Securities and Futures Commission of Hong Kong S.A.R. under the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong S.A.R.) to carry on a business in Type 1 (dealing in securities), Type 4 (advising on securities) and Type 9 (asset management) regulated activities in Hong Kong S.A.R., and may only provide its services to persons who are "professional investors" (as defined above). The content of this document has not been reviewed or approved by any regulatory authority in Hong Kong S.A.R. If you are in any doubt about any of the content in this document, you should obtain independent professional advice."

Australia

If you are accessing this document from Australia, you represent and warrant that you are a "wholesale client" as defined in section 761G of the Corporations Act 2001 (Cth) (the Act). MetLife Investment Management, LLC ("MIM, LLC") is exempt from the requirement to hold an Australian financial services license under the Act in respect of the financial services it provides to Australian clients. MIM, LLC is regulated by the SEC under United States laws, which differ from Australian laws. The information in this document is not financial product advice and should not be regarded as such and does not take account of your objectives, financial situation or needs. You should seek advice in relation to your personal situation.

If you are a resident of, or are present in, any jurisdiction not listed above, you represent and warrant that you are (or are acting on behalf of) a Professional Investor or equivalent under the applicable regulation of your jurisdiction; you are knowledgeable regarding, and have expertise in making, investments; and you make investments as a regular part of your business. No money, securities or other consideration is being solicited. No invitation is made by this document or the information contained herein to enter into, or offer to enter into, any agreement to purchase, acquire, dispose of, subscribe for or underwrite any securities or structured products, and no offer is made of any shares in or debentures of a company for purchase or subscription. Prospective clients are encouraged to seek advice from their legal, tax and financial advisors prior to making any investment.

Past performance is not indicative of future results. No representation is being made that any investment will or is likely to achieve profits or losses or that significant losses will be avoided. There can be no assurance that investments similar to those described in this document will be available in the future and no representation is made that future investments managed by MIM will have similar returns to those presented herein. All information has been presented in U.S. dollars. Actual returns may increase or decrease due to currency fluctuations.

No reliance, no update and use of information. You may not rely on this document as the basis upon which to make an investment decision. To the extent that you rely on this document in connection with any investment decision, you do so at your own risk. This document is being provided in summary fashion and does not purport to be complete. The information in this document is as of the date indicated on the cover of this document unless otherwise specified and MIM does not intend to update the information after its distribution, even in the event that the information becomes materially inaccurate. Certain information contained in this document includes performance and characteristics of MIM's by independent third parties, or have been prepared internally and have not been audited or verified. Use of different methods for preparing, calculating or presenting information may lead to different results for the information presented, compared to publicly quoted information, and such differences may be material.

Risk of loss. An investment in the strategy described herein is speculative and there can be no assurance that the strategy's investment objectives will be achieved. Investors must be prepared to bear the risk of a total loss of their investment. Your capital is at risk. Investing in the strategies discussed herein are subject to various risks which must be considered prior to investing. These risks may include, but are not limited to Liquidity Risk, Interest Rate Risk, Credit Risk, Prepayment Risk, Currency Risk, Political Risk and Counterparty Risk

No tax, legal or accounting advice. This document is not intended to provide, and should not be relied upon for, accounting, legal or tax advice or investment recommendations. Any statements of U.S. federal tax consequences contained in this document were not intended to be used and cannot be used to avoid penalties under the U.S. Internal Revenue Code or to promote, market or recommend to another party any tax-related matters addressed herein.

Forward-Looking Statements. This document may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words and terms such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "will," and other words and terms of similar meaning, or are tied to future periods in connection with a discussion of future performance. Forward-looking statements are based MIM's assumptions and current expectations, which may be inaccurate, and on the current economic environment which may change. These statements are not guarantees of future performance. They involve a number of risks and uncertainties that are difficult to predict. Results could differ materially from those expressed or implied in the forward-looking statements. Risks, uncertainties and other factors that might cause such differences include, but are not limited to: (1) difficult conditions in the global capital markets; (2) changes in general economic conditions, including changes in interest rates or fiscal policies; (3) changes in the investment environment; (4) changed conditions in the securities or real estate markets; and (5) regulatory, tax and political changes. MIM does not undertake any obligation to publicly correct or update any forward-looking statement if it later becomes aware that such statement is not likely to be achieved.
